SPECIAL PROMOTIONAL OFFERINGS

RT PC AIX OPERATING SYSTEM PROMOTIONAL OFFERING

On February 17, 1987, IBM announced a promotion that provides credit for the licensing price of the IBM Advanced Interactive Executive (AIX) toward the purchase of an RT PC New Model Series Upgrade Kit. This applies to customers who purchase an RT PC Model 15, 20, 25, or A25 and the upgrade kit, and obtain the AIX software directly from IBM during the promotional period.

The intent of the promotion is to encourage customers who may be interested in the new models of the RT PC to accept delivery of the existing models before new ones become available. The promotion makes it possible to upgrade to a new model for a net cost of about \$200 (price of the upgrade kit of \$2495, less credit for the purchase price of AIX 1.1 unit one price of \$2295). The overall system cost (old model, plus upgrade) can be significantly less than the cost of a new model RT PC, yet results in an equivalent configuration.

Every AIX 1.1 shipped after February 17, 1987, will contain a Promotion Certificate valid from April 15, 1987 through July 31, 1987, which provides to the customer return of the value paid for AIX 1.1 toward the purchase of the New Model Series Upgrade Kit.

For more information, see your IBM Marketing Representative.

STORE EXPRESS TRIAL PROGRAM

IBM is announcing a three month trial program for IBM products used in retail stores. The trial will allow a customer the opportunity to evaluate the benefits of a point-of-sale system and a store-level application system. The IBM products eligible for the trial include

- an IBM 4680 Store System configuration,
- IBM 4680 system software,
- IBM 4680 sales application software,
- an IBM Series/1 configuration,
- IBM Series/1 system software
- Store Item Receiving Program Product,
- Store Item Management Program Offering.

The trial program may be entered between November 1, 1986, and June 30, 1987. For further information, see your IBM Marketing Representative.

SPECIAL PROMOTION FOR THE IBM 5140 PC CONVERTIBLE

Effective November 4, 1986, IBM announces a promotional offering that provides customers who purchase an IBM 5140 PC Convertible within the promotional period

As of April 6, 1987

the IBM Personal Computer Disk Operating System (DOS) Version 3.2 licensed program with charges waived. IBM 5140 PC Convertible Models 002 and 022 shipped from IBM on or after November 1, 1986 and on or before April 30, 1987, will include a copy of DOS 3.2 (3.5in diskette) with charges waived.

These programs cannot be returned to IBM and cannot be exchanged or refunded for credit. These programs will not count toward any Quantity Discount Agreement (QDA) or special bid quantity commitment.

This offering is available to customers purchasing IBM 5140 PC Convertibles directly from IBM.

VOLUME PROCUREMENT

The following are abstracts from (and paraphrases of) the major quantity-purchasing agreements which apply to the IBM Personal Computer. Important information has been omitted for brevity. See your IBM Marketing Representative for complete details of these agreements.

HARDWARE - VOLUME PROCUREMENT AGREEMENT

1. The terms below are from Exhibit 32WS-14, form Z125-9076-14, dated April, 1987.

If you have a different agreement in effect, its terms will govern your purchases. Under certain circumstances, you may cancel an existing VPA without penalty in order to accept the terms of the new Agreement. See your IBM Marketing Representative for details.

2. Contract Period Duration: 12 Months from Commencement Date
3. Eligible Machines:

All machines in Category A will be aggregated to determine the Quantity of Eligible Machines for Category A.

Figure 8. VPA Discount Schedule, Category K

Greater discounts are available for a commitment of 500 or more selected machines in Category A via the Volume Procurement Agreement or by Special Bid.

(b) The 1593, 1596, and 1597 are not eligible for discounts greater than 20%.

(c) The 5294 Remote Control Unit counts toward the Total Quantity of Machines by Category but is not eligible for discounts greater than 20%.

NOTE 1: All machines in Discount Groups 1, 2, and 3 in Category B will receive the Discount Percent and Terms applicable for machines in the corresponding Discount Groups of Category A. The two Categories do not aggregate together for dermining the Category A discount.

NOTE 2: All machines in Category D will receive the Discount Percent and Terms applicable for machines in Category C. The two Categories do not aggregate together for dermining the Category C discount.

If you order a feature for installation in a machine in Discount Group 1 or 2 of Category A (other than a 3290) during the Contract Period, the feature receives a Discount Percent equal to that for the machine in which the feature will be installed. Features that could be ordered for machines on either Group will receive the Discount Percent applicable to Group 1.

5. Price Protection: (The customer is protected from price increases during the period of the Agreement).
6. Adjustment Charges: If the customer purchases fewer machines than contracted for, the customer will be charged a Reconciliation Charge per unit shipped. This charge is calculated as follows:
 - a. Subtract the discount percentage actually earned (if any, based on the number of units accepted) from the contracted discount percentage to yield the unearned discount percentage.
 - b. Convert the unearned discount percentage to a whole number (e.g., 6% becomes 6).
 - c. Multiply the resulting number by the applicable Reconciliation Charge shown below to determine the Reconciliation Charge per unit shipped.

7. The Customer may optionally extend the contract period once for three months with protected prices, subject to IBM approval, by committing to a quantity of machines that is approximately 25% higher than that in the Customer's original contract.
8. END USER CERTIFICATION: The Customer represents that the Customer is purchasing the machines for use within its own business enterprise and not for remarketing.
9. CUSTOMER FULFILLMENT OPTION:

OVERVIEW: An IBM customer who has a qualifying contract may select the most convenient, authorized sources for eligible IBM Personal Computers and related products. Purchases from all such sources will count toward fulfillment of the contract, provided that the purchases are reported to IBM in a timely manner. In particular, such purchases under the mix-and-match contracts will assist the customer in qualifying for deeper discounts on their non-PC workstation purchases (e.g., 3270's). IBM support offerings will be available to customers with qualifying contracts regardless of the authorized sources selected for their purchases.

DETAILS: Machines designated below which are purchased from an IBM Authorized Dealer, on or after June 16, 1986, and during the Contract Period, count towards the respective Total Quantity of Machines by Category. Adjustment Charges do not apply to such machines. Such sales by the Dealer to the Customer shall be under the Dealer's terms and conditions. Machines purchased from the Dealer and subsequently returned to the Dealer will not count toward this Total, nor will used machines; returns of machines must also be reported to IBM. The Customer will provide IBM with the machine type and model, serial number, date of purchase, and dealer name and address within one month of the purchase.

Figure 15. Customer Fulfillment Option Categories - RT-PC

HARDWARE - QUANTITY PURCHASE PLAN

HARDWARE - ORDERING

System units, displays, printers, and some other items carry 7-digit type and model numbers. For example, one of the PC system units has the number "5150-104." Ordering a "5150-104" would result in the shipment of that model of PC system unit.

Attachments, adapters, cables, and similar items carry 4-digit feature codes. These items are often called features. For example, the standard parallel printer cable has the feature code "5612." Feature codes are always paired with an ordering vehicle (type and model number) in an order.

When you order a feature at the same time as the device it will be installed within (or attached to), the feature code is paired with the type and model of that device; the device becomes the ordering vehicle for the feature. For example, if you order "5150-104" with feature code "5612," IBM will ship a PC system unit and a printer cable.

When you order a feature separately, the feature code is paired with a special type and model called a "special" ordering vehicle. A special ordering vehicle is a type and model number created solely for the purpose of providing a base for ordering feature codes. All PC special ordering vehicles end in "-ZZZ," for example, "5150-ZZZ." For example, if you order "5150-ZZZ" with feature code "5612," IBM will ship a printer cable by itself.

Usually there is only one special ordering vehicle for a given feature code. When there is more than one, care must be used. For example, feature code "4910" can be ordered on either "5150-ZZZ" (IBM will ship a PC Color Graphics Monitor Adapter), or on "5271-ZZZ" (IBM will ship a 3270-PC All-Points Addressable Adapter).

This Reference can be formatted to provide a cross reference which gives the ordering vehicles valid for each feature code. This cross reference, if specified, will be found at the beginning of the index.

As of April 6, 1987

When no special ordering vehicle exists for the feature you wish to add, IBM will need the type and model of the base unit, the serial number of the base unit, and the feature code you wish to add. Specify that your order is a "Miscellaneous Equipment Specification" (MES).

SINGLE SHIPMENT VOLUME OFFERING (PC AND TOKEN-RING NETWORKS)

A single-shipment volume offering is available for the IBM Token-Ring Network PC Adapter Feature and for the IBM PC Network Adapter Feature.

This offering applies to quantities contained in one customer order that are shipped in a single shipment to a single location, where the customer accepts delivery of all features. The offering may not be combined with any other discounts or allowances.

Customers will be able to order these features at reduced prices in quantities of 8 or 20.

Returns of adapter features ordered under this offering will only be considered for credit if they are returned in the same quantities as ordered.

Features purchased under this offering are intended for use within the customer's own business enterprise and not for remarketing.

Charges	Part	Feature	SSVO
Description	Number	Code	Price
IBM Token-Ring Network PC Adapter			
Quantity of 8	6339100	0370	\$ 4,726
Quantity of 20	6339100	0371	11,398
IBM PC Network Adapter			
Quantity of 8	6450213	0372	\$ 4,386
Quantity of 20	6450213	0373	10,578

SOFTWARE - QUANTITY DISCOUNT AGREEMENT

1. The terms below are from Exhibit 3580-8, form Z125-3580-08, dated April 2, 1987.

If you have a different agreement in effect, its terms will govern your purchases. Under certain circumstances, you may cancel an existing QDA without penalty in order to accept the terms of the new Agreement. See your IBM Marketing Representative for details.

As of April 6, 1987

2. Contract Period Duration: 12 Months from the Commencement Date.

3. Discount Schedule:

Applies individually to each category.

The Quantity Discount Agreement provides a discount based on the total quantity of licensed programs committed from a designated category.

Quantity of Programs by Category	Discount Percent
20-49	12%
50-149	16%
150-249	20%
250-499	24%
500-999	27%
1000-1499	30%
1500 and up	35%*

* Applies only to products ordered on
5871-BBB, 5872-BBB, 5873-BBB, 5874-BBB, or 5876-BBB.

Figure 17. QDA Discount Levels

4. ADDITIONAL LICENSES: For Eligible Licensed Programs identified in this Exhibit as Programs for which Additional Licenses are available (AL Programs), in lieu of distribution from IBM, the Customer is permitted to copy machine readable program materials. Prior to ordering an Additional License for an AL Program, the Customer must be licensed to use the AL Program and have acquired at least one program package for each such AL Program. A "program package" includes the media on which the machine readable program materials are recorded, documentation, and other associated materials.

For each Additional License ordered and accepted by IBM, the Customer is authorized to make a single additional copy of the machine-readable program materials of an AL Program (an Additional License Copy). Additional License Copies are licensed under the IBM Program License Agreement contained in the QDA, as modified by this section.

An Additional License Copy may be a copy:

- downloaded to a machine,
- recorded on portable media,
- made by any other electronic means.

Documentation in printed form may not be copied.

Ordering

Additional Licenses for AL Programs may be ordered by the Customer under the

As of April 6, 1987

QDA. Orders for Additional Licenses will be accepted only for quantities of 20 or more per AL Program.

No copies may be transferred to third parties. Labeling, auditability, and control requirements also exist. See the full text of the Agreement for details.

5. Settlement Charges: Settlement Charges have been eliminated.
6. The Customer may optionally extend the contract period once for three months with protected prices, subject to IBM approval, by committing to a quantity of programs that is approximately 25% higher than that in the Customer's original contract.
7. The customer is responsible for providing administrative and installation support at locations to which programs will be shipped.
8. END USER CERTIFICATION: The Customer represents that the Customer is licensing the programs bearing the IBM Trademark for use within its own business enterprise and not for remarketing.

THE FOLLOWING SECTION APPLIES ONLY TO THE PROGRAMS INDICATED IN THE ELIGIBLE LICENSED PROGRAM LIST WITH A DOUBLE ASTERISK (**).

9. TECHNICAL SUPPORT LOCATION/IBM SUPPORT CENTER SERVICE: The customer will identify to IBM a Technical Support Location in the United States or Puerto Rico. The Technical Support Location may register several Service Coordinators for eligibility to obtain IBM Support Center Service. Updates will be provided through object code refreshes. See "Technical Coordinator Program" on page 213.

THE FOLLOWING SECTION DOES NOT APPLY TO ADDITIONAL LICENSES, PROGRAM PACKAGE UPGRADES, AND THOSE ELIGIBLE LICENSED PROGRAMS INDICATED IN THE ELIGIBLE LICENSED PROGRAM LIST WITH AN ASTERISK (*).

10. TESTING PERIOD: For each Eligible Licensed Program which is in a category listed in the QDA, the Customer may order up to three copies of each such program for a testing period. The testing period will commence ten days after shipment of the program from IBM and end in two months or at the end of the Contract Period or the end of the Contract period as extended, which ever occurs first. At the end of the testing period, the Customer may elect to keep the evaluation copies and be billed by IBM, or the customer may elect to return the evaluation copies to IBM or destroy all evaluation copies of the program. The evaluation copies may not be transferred to any other party during the testing period.

SOFTWARE - ORDERING

Program categories are indicated in the product list by a letter which follows the four-digit feature code at the beginning of each entry. All programs of a given category assort together for determining the quantity discount that applies.

As of April 6, 1987

This Reference can be formatted to provide a cross reference which gives the ordering vehicles valid for each feature code. This cross reference, if specified, will be found at the beginning of the index.

Category	Type/Model
A	5871-AAA, 5872-AAA, 5873-AAA, 5874-AAA, 5876-AAA
B	5871-BBB, 5872-BBB, 5873-BBB, 5874-BBB, 5876-BBB

Figure 18. QDA Ordering Vehicles

The categories below were used by earlier agreements. They are reproduced here for reference.

Category	Type/Model
L	5870-LLL or 5870-LLA
M	5875-MMM or 5875-MMA

Figure 19. QDA Ordering Vehicles (Old)

The above information applies to the Quantity Discount Agreement currently being offered by IBM. Certain previous agreements required ordering all software on an ordering vehicle number created by adding "-XXX" to the type (first four digits) of the system unit, e.g. "5150-XXX."

Software which is not covered under the Quantity Discount Agreement and which bears no other ordering vehicle is ordered under 5875-XXX.

REDISTRIBUTION OF PC SOFTWARE

The IBM PC Program License Agreement permits the customer to execute a given program on only a single machine at a time, and applies to all PC software marketed by IBM.

The customer may wish to redistribute certain IBM program modules as part of applications the customer has developed. IBM provides two Agreements which make this redistribution possible:

- The IBM PC Licensed Program Redistribution Agreement (Z125-3519, for redistribution to end users unaffiliated with the redistributor)
- The Amendment to the IBM Program License Agreement (Customer Redistribution) (Z125-3527, for redistribution within the redistributor's organization)

As of April 6, 1987

If the customer's requirements are such that it is necessary to redistribute to both affiliated and unaffiliated end users, both agreements must be completed. The charges for redistribution to either category of users are the same, and there is no additional charge to redistribute to both environments.

The current cost of this service is a one-time charge of \$100 for registration as a Licensed Redistributor, in addition to the fee listed in the Exhibit for each application (not each copy of each application) containing IBM programs to be redistributed. The maximum total payment for applications used only within the internal organization of the customer is \$1000.

1) One Time Charge: \$100

2) Application Charges:

IBM Program Name	Item No.	Application Charge
-----	-----	-----
BASRUN.EXE	6135997	\$ 50

-----	-----	-----
\$50	\$85	N/A

Figure 34. CAD/CMA Settlement Charges

6. The customer is responsible for providing administrative and installation support at locations to which programs will be shipped.

MAINTENANCE - VOLUME MAINTENANCE AMENDMENT

The Volume Maintenance Amendment is available to customers who own the covered machines, or who are the primary users of the machines and who are authorized by the owner to include them under the amendment.

During the first year that machines are under the Amendment, the discount percentage will be based upon the total quantity of Qualifying Machines the customer commits will be under the Amendment at the end of the first year. The total quantity may also include those under warranty if the customer commits to include them under the Amendment immediately following the expiration of the war-

As of April 6, 1987

warranty.

If, at the end of the first year, IBM determines that the total quantity of Qualifying Machines under the Amendment and under warranty is less than the committed quantity, IBM will bill the customer for any unearned discount.

The discount percentage used during the second year will be the percentage actually earned during the first year, including those committed machines on warranty at the end of the first year.

The discount percentage used in subsequent years will be based on the number of Qualifying Machines actually under the Amendment (not under warranty) at the end of the prior year.

The customer may increase the committed quantity during the first year, and may place additional machines under the Agreement at any time. If the new quantity results in a higher discount, the new discount will apply to machines placed under the amendment on or after the date that IBM issues a revised Supplement indicating the new confirmed quantity.

Only one type of service may be specified under an Amendment for any given machine type invoiced under a specific Customer Number.

Qualifying Machines

The quantity of machines of these types committed to or under the Amendment determines your Discount.

4860	5162	8530
4950	5170*	8550
5140	5171T	8560
5150	5271	8580
5155	5273	
5160	5371	
	5373	

* When Customer Carry-In Repair is selected for this Machine Type, it is not subject to the Volume Maintenance Amendment and therefore is not included in the Quantity of Qualifying Machines.

Figure 35. VMA Qualifying Machines

Discount Schedule

Quantity of Qualifying Machines	Minimum Quantity	Discount Percent
150-499	150	15%
500-999	500	20%
1000 and up	1000	25%

Figure 36. VMA Discount Levels

Eligible Machines

Maintenance for these machines may be discounted by the percentage determined above.

As of April 6, 1987

MAINTENANCE - CORPORATE SERVICE AMENDMENT

The Corporate Service Amendment (CSA) to the IBM Maintenance Agreement provides for adjustment of maintenance charges on or after January 1, 1987, for customers who have data processing systems or networks and can demonstrate effective systems management control procedures, as defined by IBM, and determined by a detailed on-site assessment.

The Corporate Service Amendment has two options, a System Option for machine types installed in the customer's data center environment and a Network Option for machine types capable of attachment to a customer's telecommunications network.

The Electronic Customer Communications Option (ECCO) is a required function within the Network Option. ECCO is an IBM Personal Computer-based communications link with IBM. ECCO will allow customers who manage network service requirements from a central help desk to communicate with IBM regarding service via a telecommunications link. Using a customer-supplied PC with dial-up capabilities, the help desk will be able to request IBM service and to receive status updates on active IBM service calls.

Customers may obtain this offering, for eligible machines, following a qualification determination and payment of an initialization charge. The maintenance charge adjustment is established by machine type and is dependent upon the length of term selected by the customer, either one or three years.

For more information, see your IBM Marketing Representative.

As of April 6, 1987

IBM SOLUTIONPAC OFFERINGS

IBM SOLUTIONPAC - LOCAL AREA NETWORK IMPLEMENTATION SERVICES

The LAN Implementation Services offerings assure logical design and provide physical network design, network product installation, end-user network orientation, and telephone assistance to the customer installing an IBM Token-Ring Network or an IBM PC Network.

LAN IMPLEMENTATION SERVICES I

LAN Implementation Services I assumes a simple environment with no wiring closets, wiring panels, or distribution racks. The LAN interconnection is accomplished through one or more 8228 Multistation Access Units for Token-Ring Networks. IBM Patch Cables or equivalents are used as the cabling system. For the IBM PC Network the IBM PC Network Cabling Kit (which includes the IBM 5178 PC Network Translator Unit) is the interconnection method. Neither bridging nor gateways are acceptable in the LAN Implementation Services definition of a simple environment.

IBM will review and document the logical design of the network as provided by the customer. IBM will provide a network physical design, including a written report outlining the physical requirements for the installation. IBM will install IBM Personal Computer workstations, selected workstation features and LAN software under this agreement.

IBM will install, configure, and test the IBM Token-Ring or IBM PC Network software on each network station, excluding applications software.

Local area network end-user orientation and customer telephone assistance for a period of 60 days are also included.

LAN IMPLEMENTATION SERVICES II AND IIA

LAN Implementation Services II and IIA assume a more complex environment where wiring closets, wiring panels, distribution racks, and/or 8228s are required. LAN Implementation Services II and IIA support multi-ring bridges and the presence of gateways.

Version IIA is for customers who already have the IBM Cabling System installed.

IBM will review and document the logical design of the network as provided by the customer. IBM will provide a network physical design, including a specification of work for installation of the IBM Cabling System to be installed by the customer.

As of April 6, 1987

LAN IMPLEMENTATION SERVICES III

LAN Implementation Services III assumes that LAN Implementation Services II or IIa criteria have been satisfied.

IBM will install IBM Personal Computer workstations, selected workstation features and LAN software under this agreement.

IBM will install, configure, and test the IBM Token-Ring or IBM PC Network software on each network station, excluding applications software.

Local area network end-user orientation and customer telephone assistance for a period of 60 days are also included.

CHARGES

LIS-I	LAN Implementation Services I - Base Fee	1500

IBM SOLUTIONPAC - PERSONAL PUBLISHING

The IBM SolutionPac Personal Publishing System and Personal Publishing Option enhance the IBM PC family by providing the facilities to electronically design and layout documents, which contain text in a variety of type styles and graphics, for the application commonly known as "Desktop Publishing." Ninety days of end user usage and defect support is included.

The IBM SolutionPac Personal Publishing System includes:

- IBM Personal System/2 Model 30 (8530)
- IBM Personal System/2 Display (8503 or 8513)
- IBM Personal System/2 Mouse (FC 8770)
- IBM Personal Pageprinter (4216)
- IBM Personal Pageprinter Adapter
- IBM Personal Pageprinter Adapter Program
- IBM and Vendor environment/application software

As of April 6, 1987

The IBM SolutionPac Personal Publishing Option upgrades an existing 5162, 5170, or 8530 and includes:

- IBM Personal Pageprinter (4216)
- IBM Personal Pageprinter Adapter
- IBM Personal Pageprinter Adapter Program
- IBM and Vendor environment/application software

The IBM and Vendor software referred to above includes:

- support for the full PostScript language
- Microsoft Windows
- Aldus Pagemaker

IBM SolutionPac, Personal Publishing System, with 8530 and Monochrome Display (3Q87)	8553

Installation fee, SolutionPac Personal Publishing System (3Q87)	290
Installation fee, SolutionPac Personal Publishing Option (3Q87)	335

IBM SOLUTIONPAC - BRANCH BANKING AUTOMATION

IBM has customizing services for selected Branch Banking Automation software. IBM Information Services - Professional Services will provide fee offerings to help customers plan, design, customize, and implement the following Personal Computer-based products:

- BANCStar 4700 Series
- Branchbanker 4700
- Safe Deposit 4700
- Currency Control 4700
- Loan Loss Control 4700

Customers can select from a list of service offerings that best fit their implementation requirements.

The fee offerings include:

Finance Software Planning

This is a fixed-price consulting service, performed on the customer's premises, that will produce a project plan which identifies the tasks required to install the customer's selected software. As part of the offering, the customer will receive an application customizing guide and instructions to assist in identifying unique application requirements.

Finance Software Design

As of April 6, 1987

This is a fixed-price consulting service, performed on the customer's premises using Joint Application Design techniques to complete the application mark-up document.

Finance Software Customizing

Customizing the software products is performed by a Finance Industry Customer Support Team located at an IBM facility in Charlotte, North Carolina for a fixed price. The customizing service results in either machine-readable or source code, and appropriate documentation.

Customizing is limited to the use of standard customizing facilities available in each product. If further customizing is required, IBM can propose modification services through the use of exits provided by the product.

Finance Software Implementation Assistance

Services are available for those customers needing implementation assistance for the customized software.

IBM SOLUTIONPAC - STORE INSTALLATION SERVICES

IBM Store Installation Services consist of six individual service offerings for retail stores customers. These services are designed to assist customers to easily install IBM Point-of-Sale systems and IBM In-Store processors in their stores by selecting the service offering(s) from IBM that match their needs.

The 4680-related offerings are:

IBM 4680 INSTALLATION PLANNING

IBM will provide a unique, tailored installation package including loop wiring and addressing information.

IBM 4680 INSTALLATION (PILOT STORES)

IBM will unpack, assemble, and connect to existing wiring, customize (by entering the provided parameters), load application code, and test the IBM 4680 system at the customer's pilot location(s).

IBM 4680 APPLICATION INSTALLATION AND CUSTOMIZATION

IBM will install the IBM 4680 operating system and the General Sales Application, the Grocery Sales Application, or the Drug Sales Application on the

As of April 6, 1987

customer's IBM 4680 system. IBM will customize (by entering the provided parameters) the application and system software.

Other services, not outlined below in "Charges," are also available.

CHARGES

4680 Installation Planning, per store location	650
4680 Installation for the first 5170 store controller, the first 4683, and the first 3687, plus software	650
Installation for each additional 5170 store controller, installed at the same location at the same time	175
Installation for each additional 4683, installed at the same location at the same time	115
Installation for each additional 3687, installed at the same location at the same time	60
Installation for each 5153, installed at the same location at the same time	60
Installation for each 5178, installed at the same location at the same time	60
4680 Application Software Installation and Customization for each store installation	4750

IBM SOLUTIONPAC - CONSTRUCTION INDUSTRY SERIES

The IBM SolutionPac - Construction Industry Series offerings each provide a combination of (1) accounting and information handling licensed programs for a specific construction environment, (2) installation and education services, and (3) end user support. These SolutionPacs can assist construction firms requiring financial information on a real-time basis and desiring specialized reports and inquiries with the options to add other accounting applications and networking. The support services in these offerings include installation of the SolutionPac software, education on the use of the SolutionPac, and technical support through a response line for 90 days.

This SolutionPac is a service of selected IBM Authorized PC Dealers and Value Added Dealers, and is based on a series of Timberline Software products.

IBM SOLUTIONPAC - BUSINESS ADVISER FINANCIAL ACCOUNTING

The IBM SolutionPac - Business Adviser Financial Accounting offerings each provide a combination of (1) financial accounting and information handling licensed programs, (2) installation and education services, and (3) end user support.

As of April 6, 1987

These SolutionPacs can assist small businesses requiring financial information on a real-time basis and desiring specialized reports and inquiries with the options to add other accounting applications and networking. The support services in these offerings include installation of the SolutionPac software, education on the use of the SolutionPac, and IBM support through an 800 number for 90 days.

This SolutionPac is a service of selected IBM Authorized PC Dealers and Value Added Dealers, and is based on IBM Business Adviser software.

IBM SOLUTIONPAC - DOCTOR'S OFFICE MANAGEMENT

IBM SolutionPac - Doctor's Office Management provides packaged software and services to the medical professional. The applications are designed to meet the need of the professional in handling office functions such as billing, insurance, accounts receivable, patient-record keeping, and appointment scheduling. This SolutionPac also includes program installation, end user education, and technical support through an 800 number for 90 days.

This SolutionPac is a service of selected IBM Authorized PC Dealers and Value Added Dealers, and is based on IBM Doctor's Office Management software.

IBM SOLUTIONPAC - CADWRITE DESIGN AND DRAFTING SYSTEM

IBM SolutionPac - CADwrite Design and Drafting System is a two-dimensional drafting system with isometric capability targeted for the single workstation personal computer. The SolutionPac includes CADwrite and PC DOS. This SolutionPac also includes program installation, education on use of the SolutionPac, and IBM support through an 800 number for 90 days.

This SolutionPac is a service of selected IBM Authorized PC Dealers and Value Added Dealers, and is based on CADwrite Design and Drafting System software.

IBM SOLUTIONPAC - LEGAL PROFESSION SERIES

The IBM SolutionPac - Legal Profession Series provides application support to improve productivity in the legal environment. Each configuration includes Manac-Omnilaw as a prerequisite and at least one additional application module from IBM or Manac. The Lawyer's Assistant configuration includes a prepackaged set of Assistant Series modules, and the Law Firm Secretarial configuration includes IBM Displaywrite/4, IBM Displaywrite Legal Support, and IBM Index Support. All other modules are provided by Manac. The support services in this offering include installation of the SolutionPac software, education on use of the SolutionPac, and IBM support through an 800 number for 90 days.

This SolutionPac is a service of selected IBM Authorized PC Dealers and Value Added Dealers.

SK2T-0953	Hardware Maintenance and Service, High Speed Adapter/A	23.75

As of April 6, 1987.

MODEL/FC VPA	DESCRIPTION	PRICE
COMMUNICATIONS HARDWARE AND SOFTWARE - PERSONAL SYSTEM/2 (EXCEPT 8530)		

GENERAL

All models of the Personal System/2 contain integrated serial and parallel adapters. The following features provide enhanced functions.

3042 a	IBM Personal System/2 Multi-Protocol Adapter/A (supports async, BSC, HDLC, SDLC to 19.2KBPS)	295
S68X-2220	Technical Reference Manual, Multi-Protocol Adapter/A, Personal System/2	12

ASYNCHRONOUS COMMUNICATION, PERSONAL SYSTEM/2 (EXCEPT 8530)

See also the Multi-Protocol Communication Adapter/A

0349 a	IBM Personal System/2 300/1200 Internal Modem/A (asynchronous)	395
S68X-2275	Technical Reference Manual, Internal Modem/A, Personal System/2	6
S68X-2274	Hardware Maintenance Reference Supplement, 300/1200 Modem/A	12
3033 a	IBM Personal System/2 Dual Async Adapter/A (2 independent async ports to 19.2KBPS, max. 3 per system)	210
S68X-2217	Technical Reference Manual, Dual Async Adapter/A, Personal System/2	6

TWINAXIAL S/36, S/38 ATTACHMENT, PERSONAL SYSTEM/2 (EXCEPT 8530)

6279 a	IBM System 36/38 Workstation Emulation Adapter/A and Quick Reference (incl. Diagnostics, 12/87)	620
6293 a	IBM System 36/38 Workstation Emulation Attachment Cable (12/87)	65
SY31-9053	IBM System 36/38 Workstation Emulation Adapter Hardware Maintenance and Service (12/87)	??
SA21-9862	IBM System 36/38 Workstation Emulation Adapter Technical Reference (12/87)	??
SA21-9925	IBM System 36/38 Workstation Emulation Adapter/A Quick Reference and Diagnostics (12/87)	??

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6286 A	IBM System 36/38 Workstation Emulation Program V.1.0 (4 sessions, graphics support) (3.5in) Test Period 2 months, Warranted, Central Service to 12/90 (12/87)	160
6287 A	IBM System 36/38 Workstation Emulation Program Convenience Kit, (incl. FC 6286, 6297, 6293, SA21-9925) Test Period 2 months, Warranted, Central Service to 12/90 (12/87)	845
SC21-8068	System 36/38 Workstation Emulation Program Technical Reference (12/87)	??

COAXIAL COMMUNICATIONS, PERSONAL SYSTEM/2 (EXCEPT 8530)

2000 a	IBM 3270 Connection for Personal System/2 (coax adapter) (5/29/87, except attachment to 8580-041/-071 available 9/25/87)	595
G126-0190	3270 Connection Quick Reference and Diagnostics (5/29/87)	??
GA23-0339	3270 Connection Technical Reference (5/29/87)	??

LOCAL AREA NETWORKS, PERSONAL SYSTEM/2 (EXCEPT 8530)

IBM TOKEN-RING NETWORK, PERSONAL SYSTEM/2 (EXCEPT 8530)

8228-KT3	IBM Token-Ring Network Starter Kit/A (1-8228, 1-Component Housing, 4-TR PC Adapter/A, 4-TR PC Cable, 4-30ft. Jumper Cable, 4-LAN Support Pgm, 4-LAN Pgm 1.2, TR Starter Kit Guide) (5/87)	4710
4790 a	IBM Token-Ring Network Adapter/A for Personal System/2 (function equivalent to Adapter II)	795
8881 a	Remote Program Load for Token-Ring Network Adapter/A (EPROM) (6/87)	90
6466690	Update to Token-Ring Network PC Adapter Technical Reference for the Adapter/A (Chapter 9)	??
83X9112	IBM Token-Ring Network Adapter/A Hardware Maintenance Reference and Service Manual	270

IBM PC NETWORK, PERSONAL SYSTEM/2 (EXCEPT 8530)

1222 a	IBM PC Network Adapter II/A (broadband, 1 per PC, incl. 9-ft. coax, req. LAN Support Program or PC Network Protocol Driver)	570
--------	---	-----

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
S68X-2263	IBM PC Network Adapter II/A Technical Reference	21.25
S68X-2271	IBM PC Network Hardware Maintenance and Service Supplement/A	8.50
1223 a	IBM PC Network Baseband Adapter/A (req. LAN Support Program)	470
S68X-2264	IBM PC Network Baseband Adapter/A Technical Reference	21.25

PROCESSORS - 3270-PC VERSIONS

For associated software, see "Coaxial Communication (3270-PC Family)" on page 91.

5271 models with XMA or the Enhanced Keyboard require 3270-PC Control Program Version 3.0 or later.

The following system units are based on a planar board (motherboard) capable of holding up to 256KB of memory.

5271-002 a	IBM 3270-PC (256KB) w/3270-PC Keyboard and one Dual-Sided Diskette Drive (Discount Group A2) (W/D 7/2/87)	3620
5271-004 a	IBM 3270-PC (384KB) w/3270-PC Keyboard and two Dual-Sided Diskette Drives, Printer Adapter (Discount Group A2) (W/D 7/2/87)	4075
5271-006 a	IBM 3270-PC (384KB) w/3270-PC Keyboard and one Dual-Sided Diskette Drive, one 10MB Disk Drive, Printer Adapter (Discount Group A2) (W/D 7/2/87)	4575

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
The following system units are based on a planar board (motherboard) capable of holding up to 640KB of memory		
5271-030 a	IBM 3270-PC (640KB) w/3270-PC Keyboard and one Half-Height Diskette Drive, Printer Adapter (Discount Group A2) (W/D 7/2/87)	3860
5271-P30 a	As model 030, but with Enhanced Keyboard (Discount Group A2) (W/D 7/2/87)	3860
5271-031 a	IBM 3270-PC (256KB + XMA) w/3270-PC Keyboard and one Half-Height Diskette Drive, Printer Adapter (Discount Group A2) (W/D 7/2/87)	4870
5271-P31 a	As model 031, but with Enhanced Keyboard (Discount Group A2) (W/D 7/2/87)	4870
5271-050 a	IBM 3270-PC (640KB) w/3270-PC Keyboard and two Half-Height Diskette Drives, Printer Adapter (Discount Group A2) (W/D 7/2/87)	4010
5271-P50 a	As model 050, but with Enhanced Keyboard (Discount Group A2) (W/D 7/2/87)	4010
5271-051 a	IBM 3270-PC (256KB + XMA) w/3270-PC Keyboard and two Half-Height Diskette Drives, Printer Adapter (Discount Group A2) (W/D 7/2/87)	5020
5271-P51 a	As model 051, but with Enhanced Keyboard (Discount Group A2) (W/D 7/2/87)	5020
5271-070 a	IBM 3270-PC (640KB) w/3270-PC Keyboard and one Half-Height Diskette Drive, 20MB Fixed Disk, Printer Adapter (Discount Group A2) (W/D 7/2/87)	4200
5271-P70 a	IBM 3270-PC (640KB) w/Enhanced Keyboard and one Half-Height Diskette Drive, 20MB Fixed Disk, Printer Adapter (Discount Group A2)	4200
5271-071 a	IBM 3270-PC (256KB + XMA) w/3270-PC Keyboard and one Half-Height Diskette Drive, 20MB Fixed Disk, Printer Adapter (Discount Group A2) (W/D 7/2/87)	5210
5271-P71 a	IBM 3270-PC (256KB + XMA) w/Enhanced Keyboard and one Half-Height Diskette Drive, 20MB Fixed Disk, Printer Adapter (Discount Group A2)	5210

In addition to the options listed below, these models of the 3270-PC (only) support the following PC options:

- 3325 - 360KB Half-Height Diskette Drive
- 3326 - 20MB Fixed Disk Drive
- 3327 - 20MB Fixed Disk Adapter

5730 a	3270-PC Keyboard (replacement if ordered separate)	295
5790 a	Programmed Symbols Adapter (Discount Group A2) for 5271	800
4910 a	All Points Addressable Adapter for 5271 (Discount Group A2)	550
4505 a	Printer/Memory Adapter w/128KB Memory (Discount Group A2)	305
4500 a	256KB Memory Adapter (installs on FC4505, Discount Group A2)	290

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
3910 a	IBM 2MB Expanded Memory Adapter (XMA) for 5271, 5273, supported by 3270 Workstation Program as XMA, EMS, and VDISK, incl. printer adapter	1295
3350 a	Expanded Memory Adapter (XMA, 1MB + Printer Adapter, Discount Group A2, part numbers 59X9973 and 8649447	1230
3360 a	Expanded Memory 1MB Module Kit (1MB additional, mounts on FC3350, Discount Group A2)	365
8V0196	RPQ to attach 5271 to 4701	N/C
5272-001 b	Color Display for 3270-PC (14in Diagonal) (8 color, 25 line x 80 character, 720H x 350V resolution, .25 Megapel, 9 x14 character cell) (Discount Group B2)	995

The 5271 also supports the 5151 PC Monochrome Display as an alternative to the 5272 Color Display.

3270-PC SUPPORT PUBLICATIONS

GA23-0179	3270-PC Introduction and Preinstallation Planning Manual	N/C
3520	3270-PC Hardware Maintenance and Service Manual (models 30, 50, 70)	60.25
3530	3270-PC Hardware Maintenance and Service Manual (640KB motherboard models exc. 30, 50, 70)	65.75

PROCESSORS - 3270-PC/AT VERSIONS

For associated software, see "Coaxial Communication (3270-PC Family)" on page 91.

The 5273 models require DOS 3.1 and 3270-PC Control Program Version 2.1 or later.

5273 models with XMA or the Enhanced Keyboard or an 8MHz motherboard require 3270-PC Control Program Version 3.0 or later.

5273-020 a	IBM 3270-PC/AT (6MHz, 512KB) w/3270-PC Keyboard and one High-Capacity Diskette Drive, Serial/Parallel Adapter (Discount Group A2) (W/D 7/2/87)	5745
------------	--	------

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5273-041 a	IBM 3270-PC/AT (6MHz, 640KB) w/3270-PC Keyboard and two High-Capacity Diskette Drives, Serial/Parallel Adapter (Discount Group A2) (W/D 7/2/87)	6370
5273-042 a	Same as model 41 plus Extended Graphics Adapter (Discount Group A2) (W/D 7/2/87)	6920

5273-P70 a	IBM 3270-PC/AT (8MHz, 640KB) w/Enhanced Keyboard and one High-Capacity Diskette Drive, 30MB Disk Drive, Serial/Parallel Adapter (Discount Group A2)	6440
5273-071 a	IBM 3270-PC/AT (8MHz, 256KB + XMA) w/3270-PC Keyboard and one High-Capacity Diskette Drive, 30MB Disk Drive, (Discount Group A2) (W/D 7/2/87)	7170
5273-P71 a	IBM 3270-PC/AT (8MHz, 256KB + XMA) w/Enhanced Keyboard and one High-Capacity Diskette Drive, 30MB Disk Drive, (Discount Group A2)	7170
	For Expanded Memory Adapter (XMA) see also FC 3910, the IBM 2M Expanded Memory Adapter.	
3355 a	Expanded Memory Adapter (XMA, 1MB + printer adapter, Discount Group A2, part numbers 59X9962 and 8649447)	1230
3360 a	Expanded Memory 1MB Module Kit (1MB additional, mounts on FC3355, Discount Group A2)	365
	Ordering PS features: Order #4912 if a PS feature has previously been installed in the system unit, otherwise order #4911.	
4911 a	Extended Graphics Adapter (Short connectors) (Standard on models 42 and 62), for PC graphics 720h x 350v or 640h x 200v x 2 color, also 360h x 350v or 320h x 200v x 4 color (Discount Group A2)	550
4912 a	Extended Graphics Adapter (Long connectors) (Standard on models 42 and 62) for PC graphics, 720h x 350v or 640h x 200v x 2 color, also 360h x 350v or 320h x 200v x 4 color (Discount Group A2)	550
	Order #5792 if an XGA feature has previously been installed in the system unit, or an XGA feature is concurrently ordered, otherwise order #5791.	

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
	Whichever feature is chosen, if it is ordered separately for field setup, order under 5273-ZZZ.	
5791 a	Programmed Symbols (PS) Adapter (Short connectors) for host graphics, six 190-symbol sets (Discount Group A2)	800
5792 a	Programmed Symbols (PS) Adapter (Long connectors) for host graphics, six 190-symbol sets (Discount Group A2)	800
3005	5085 Attachment to 3270-PC/AT, Incl. Graphics Interface Control Program, Warranted, Central Service for 90 days or to 6/87 (Order on 5085)	2045
9600	Graphics Interface Control Program (separately) Warranted, Central Service for 90 days or to 6/87	250

Also accepts the following PC/AT and 3270-PC options:

- 5272-001 - 3270-PC Color Display
- 5151-001 - PC Monochrome Display
- 0205 - 20MB Fixed Disk Drive
- 0206 - High Capacity Diskette Drive
- 0207 - Dual-Sided Diskette Drive
- 0209 - 128KB Memory Expansion Option
- 0211 - Math Co-Processor Option
- 0218 - Floor Standing Enclosure

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5271-026 a	IBM 3270-PC (384KB) w/3270-PC Keyboard and one Dual-Sided Diskette Drive, one 10MB Disk Drive, Printer Adapter (Discount Group A2) (W/D 7/2/87)	5915
	See 'PC Displays and Adapters' for the 3295 Display.	

PROCESSORS - 3270-PC / G AND GX VERSIONS

For associated software, see "Coaxial Communication (3270-PC Family)" on page 91.

PROCESSORS AND OPTIONS

The 3270-PC/AT /G and /GX require DOS 3.1 and the 3270-PC Graphics Control Program Version 2 or later.

5373-160 a	IBM 3270-PC/AT /G/GX (6MHz, 512KB) w/Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, one High-Capacity Diskette Drive, one 20MB Disk Drive, 3270-PC Keyboard	5535
5373-A60 a	Same as Model 160 except APL Keyboard	5535
5373-161 a	IBM 3270-PC/AT /G/GX (6MHz, 640KB) w/Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, one High-Capacity Diskette Drive, one 20MB Disk Drive, 3278/79 Emulation Adapter, 3270-PC Keyboard	6480
5373-A61 a	Same as Model 161 except APL Keyboard	6480
5373-162 a	IBM 3270-PC/AT /G/GX (6MHz, 512KB + 512KB) w/80287, Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, one High-Capacity Diskette Drive, one 20MB Disk Drive, 3278/79 Emulation Adapter, 3270-PC Keyboard	6800
5373-A62 a	Same as Model 162 except APL Keyboard	6800
5373-A29 a	IBM 3270-PC/AT/G (8MHz, 512KB + 512/2MB expansion) w/Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, 80287, High-Capacity Diskette Drive, 30MB Disk Drive, 3270-PC APL Keyboard	6810
5373-A39 a	IBM 3270-PC/AT/GX (8MHz, 512KB + 512/2MB expansion) w/Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, 80287, High-Capacity Diskette Drive, 30MB Disk Drive, 3270-PC APL Keyboard	6810

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5373-E29 a	IBM 3270-PC/AT/G (8MHz, 512KB + 512/2MB expansion) w/Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, 80287, High-Capacity Diskette Drive, 30MB Disk Drive, Enhanced Keyboard	6810
5373-E39 a	IBM 3270-PC/AT/GX (8MHz, 512KB + 512/2MB expansion) w/Display/Mouse/Tablet Adapter, Serial/Parallel Adapter, 80287, High-Capacity Diskette Drive, 30MB Disk Drive, Enhanced Keyboard	6810
5730 a	Standard 3270-PC Keyboard (incl.overlay)	295
5731 a	APL 3270-PC Keyboard (incl. overlay)	295
3907 a	IEEE-488 Adapter and Cable for 5371 models (Cable is PN 6450601, incl.in FC 3907)	545
<p>(Use FC 1503 to order the IEEE-488 Adapter for 5373 models. Use FC 5040 to order IEEE-488 Cable for FC 1503.)</p>		
5277-001 g	IBM Optical Mouse	340
5083-002	Graphics Tablet	650
1511 a	Cursor (Crosshair Mouse or 'Puck')	175
6351 a	Stylus	100
6248435	5083-2 PC Attach Power Supply and Cable, attaches tablet to PC, XT, AT, req. async. adapter, AT also req. FC 0242 or FC 0217	150
<p>The following kits upgrade a PC/AT model 068 or 099 to a 3270-PC/AT/PC/G or /GX.</p> <p>Order FC 3112 or 3113 for documentation. FC 2507 may be added for 3278/79 emulation. FC 5730 or 5731 keyboards may be added.</p>		
7001 a	3270-PC/AT/G Option Kit (Upgrade 6MHz 5170 to /G, incl. display / mouse / tablet adapter, mouse / tablet cable, keyboard cable)	770
7011 a	3270-PC/AT/G Option Kit (Upgrade 5170-319/339 to /G, incl. display / mouse / tablet adapter, mouse / tablet cable, keyboard cable)	770
7002 a	3270-PC/AT/GX Option Kit (Upgrade 6MHz 5170 to /GX, incl. display / mouse / tablet adapter, mouse / tablet cable, keyboard cable, VDI drivers)	770
7012 a	3270-PC/AT/GX Option Kit (Upgrade 5170-319/339 to /GX, incl. display / mouse / tablet adapter, mouse / tablet cable, keyboard cable, VDI drivers)	770

IBM 3270-PC/G /GX SUPPORT PUBLICATIONS

GA33-3157	Introducing the IBM-3270/PC/G and /GX Ranges of Workstations	N/C
-----------	--	-----

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
GA33-3158	3270-PC/G and /GX Ranges of Workstations: Planning Guide	N/C
3112 b	3270-PC/AT/G Guide to Operations and Maintenance Information Manual (order on 5278-002)	N/C
3113 b	3270-PC/AT/GX Guide to Operations and Maintenance Information Manual (order on 5378-?01)	N/C
7003 a	3270-PC/G Guide to Operations and Maintenance Information Manual (order on 5371-ZZZ)	N/C
7004 a	3270-PC/GX Guide to Operations and Maintenance Information Manual (order on 5371-ZZZ)	N/C

PC/G DISPLAY OPTIONS

5278-001 b	Display Attachment Unit	2530
7003 a	Specify attachment to 5371 (Guide to Operations, Maintenance Information, same as FC above)	N/C
3112 b	Specify attachment to 5373 (Guide to Operations, Maintenance Information, same as FC above)	N/C
5278-002 b	Display Attachment Unit for PC/AT /G	2530
3112 b	Specify attachment to 5373 (Guide to Operations, Maintenance Information, same as FC above)	N/C
5279-001 b	14in Display (8 color, 80 character x 32-49 line, 720Hx512V resolution, .37 Megapel, host character cell 9x16 or 9x10, or 8x16 in PC session)	960
7675 a	Stand with Tilt, Swivel, Height adjust	200
7676 a	Stand with Tilt, Swivel adjust	N/C

PC/GX DISPLAY OPTIONS

5378-C01 b	Display Attachment Unit - Color	5815
7004 a	Specify attachment to 5371 (Guide to Operations, Maintenance Information, same as FC above)	N/C
3113 b	Specify attachment to 5373 (Guide to Operations, Maintenance Information, same as FC above)	N/C
5378-M01 b	Display Attachment Unit - Monochrome	5465
7004 a	Specify attachment to 5371 (Guide to Operations, Maintenance Information, same as FC above)	N/C
3113 b	Specify attachment to 5373 (Guide to Operations, Maintenance Information, same as FC above)	N/C
5335	5378 Microcode Upgrade Kit for use with 3270-PC/AT (5373)	N/C
5379-C01 b	19in Display - Color (16 color, 80 character x 50 line, 1024Hx1024V resolution, 1.00 Megapel, 12x20 character cell)	2520
5379-M01 b	19in Display - Monochrome (2 color, 80 character x 50 line, 1024Hx1024V resolution, 1.00 Megapel, 12x20 character cell)	1925

MODEL/FC VPA	DESCRIPTION	PRICE
--------------	-------------	-------

PROCESSORS - PC/XT/370 AND PC/AT/370 VERSIONS

For associated software, see "VM/PC" on page 141.

The motherboard of the PC/AT/370 contains 512KB. The S/370 Feature Card Set contains another 512KB for the use of the S/370 processor, making a total of 1MB. In PC mode, 640KB of that total is useable by the 80286.

5170-919 a	IBM PC/AT System Unit (8MHz, 1MB) w/std. AT keyboard, serial/parallel adapter, one 30MB Fixed Disk, one High-Capacity Diskette drive, S/370 AT Feature Card Set, 3278/79 Adapter	7290
5170-939 a	IBM PC/AT System Unit (8MHz, 1MB) w/Enhanced keyboard, serial/parallel adapter, one 30MB Fixed Disk, one High-Capacity Diskette drive, S/370 AT Feature Card Set, 3278/79 Adapter	7290
6115 a	IBM PC/AT S/370 Option Kit to upgrade existing PC/AT, order 3278/79 adapter separately	2100

PC/AT/370 SUPPORT PUBLICATIONS

2527 a	Technical Reference Manual - IBM PC/AT/370	28
2529 a	Hardware Maintenance & Service (Manual and Advanced Diagnostic Diskette) for the IBM PC/AT/370	60
2980 a	Hardware Maintenance & Service for the 3278/79 Emulation Adapter in the IBM PC/AT/370	22

PROCESSORS - SERIES/1 VERSIONS

For associated software, see "Series/1 PC Operating Systems" on page 140.

5170-496 a	Series/1 PC/AT System Unit (8MHz) w/std. AT keyboard, 20MB fixed disk, 1MB diskette drive, 1MB memory, I/O controller, 6-port host/terminal attach card, serial/parallel attachment	10695
0401 a	3101 Display Cable, 15m	100
3629 a	Six-Port Terminal/Host Adapter for 4 RS-422 ports, 2 RS-232 ports for async/BSC to 9600 bps	750

Also supports the following 5170 options in Series/1 mode:

- 0205 - 20MB Fixed Disk Drive
- 0206 - High Capacity Diskette Drive
- 0207 - Dual Sided Diskette Drive
- 0210 - 30MB Fixed Disk Drive
- 0215 - Serial/Parallel Adapter

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
• 0216	- Display Stand	
• 0217	- Serial Adapter Cable	
• 0218	- Floor Standing Enclosure	
• 0242	- Serial Adapter Connector	
• 1003	- 64KB Memory Module Kit	

F/C 1003 is for Series/1 processor storage upgrades. Must be ordered in 128KB increments.

• 1204	- Binary Synchronous Communication Adapter	
• 1205	- SDLC Communication Adapter	
• 4900	- Monochrome Display and Printer Adapter	
• 4910	- Color Graphics Monitor Adapter	

SERIES/1 PC SUPPORT PUBLICATIONS

2241 a	Guide to Operations - S/1 PC/AT	49.50
2242 a	Hardware Maintenance and Service Manual - S/1 PC/AT	295
2243 a	Technical Reference Manual - S/1 PC/AT	30
2491 a	Installation and Setup Guide - S/1 PC/AT	29.50

PROCESSORS - 4680 PC VERSION

For a special promotional offering on the following item, see "Store Express Trial Program" on page 1.

For associated software, see "4680 Operating System for 5170 Point-of-Sale" on page 144.

5170-849 a	IBM PC/AT System Unit (8MHz, 512KB)w/80286 CPU, Enhanced Keyboard, Keylock, Clock/Calendar, High-Capacity Diskette Drive, 30MB Fixed Disk+Adapter, Serial/Parallel Adapter, Store Loop Adapter	5670
4683-001	Point-of-Sale Terminal (attach to Store Loop driven by 5170 Store Controller)	2780
4683-002	Point-of-Sale Terminal (attach to 4683-001)	1265

Specify one of the following lock inserts for each printer (FC 3380), cash drawer (FC 3360, 3361), or keyboard (FC 3320).

9201	Lock insert, randomly selected, with 2 keys	N/C
9202	(FC's 9292-9221, PN's 4783902-4783921) Lock insert, specific, with 2 keys	N/C
9223	Lock insert, non-operating	N/C
3339	Shopper Display, 8-Position Numeric (9/87)	205

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
3340	Operator Display, 2 Rows of 20 Characters (9/87)	275
3342	Display Extension Cable (for use when FC3339 or FC3340 are separated from 4683 base) (9/87)	47
3343	40-Character Alphanumeric Display	360
3344	Alphanumeric Display Cable, Integrated	11
3345	Alphanumeric Display Cable, Distributed	42
3354	300mm (12in) Monochrome Display	290
3355	Cable for 300mm Display	65
3356	Tilt, Swivel Pedestal for 300mm Display	20
6316710	127mm (5in) Monochrome Display	280
6316852	Cable for 127mm Display, Distributed	65
3352	346mm (14in) Color Display, 480 or 1920 Characters (9/87)	680
3353	346mm (14in) Color Display Cable (9/87)	75
3359	346mm (14in) Color Display Pedestal (9/87)	20
3320	50-key Modifiable Keyboard	264
3322	84-key Alphanumeric Keyboard, Modifiable, w/Mgr Keylock (req. FC3325 or FC3326) (9/87)	490
3325	Keyboard Cable, Integrated	14
3326	Keyboard Cable, Distributed	38
3330	Keybutton Kit, Retail Format	5
3357	Line Cord, 9-foot	10
3358	Line Cord, 6-foot	10
3360	Cash Drawer, Fixed Till	205
3361	Cash Drawer, Adjustable Till	209
3364	Cash Drawer Cable, Integrated	10
3365	Cash Drawer Cable, Distributed	27
3380	Printer	724
3384	Printer Cable, Integrated	31
3385	Printer Cable, Distributed	69
4000	Feature Expansion A	475
4001	Feature Expansion B	315
4002	Feature Expansion C	524
4003	Feature Expansion D	586
4010	Magnetic Stripe Reader	182
4012	Security Base	21
4014	Adapter for 3687 Checkout Scanner Model 2	174
4016	Magnetic Wand Reader	378
4020	Asynchronous Communication Cable, RS-232C	87
4022	Asynchronous Communication Cable, RS232C or Current Loop	96
4024	Non-IBM OCR Hand-Held Reader Cable	98
4030	Base Unit Cable for 4683-2, 6 meters	44
4032	Base Unit Cable for 4683-2, 20 meters	107
4034	Base Unit Cable for 4683-2, 4 meters	90
3466	Non-IBM Special Attachment Cable	40
4026	Non-IBM Scale Cable	76
4028	Non-IBM Coin Dispenser Cable	55
8002	Second Store Loop Adapter	835
8003	Store Loop Cable	41

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
1520-A02	Hand-Held Scanner (req. FC 3326 for attachment to 4683)	1735
9512	4683 Power Cable, 4.3m (14ft) Locking (specify code)	N/C
9510	4683 Power Cable, 4.3m (14ft) Non-Locking (specify code)	N/C
9513	4683 Power Cable, 1.8m (6ft) Locking (specify code)	N/C
9511	4683 Power Cable, 1.8m (6ft) Non-Locking (specify code)	N/C
1584-S01	Toledo Scales, Scale Model 8213-006 (special bid only)	619
1584-S02	Toledo Scales, Scale Model 8213-007 (special bid only)	599
6724	Remote Display for Toledo Scales 8213-007 with 7-ft. cable (special bid only)	100
6725	Remote Display for Toledo Scales 8213-007 with 25-ft. cable (special bid only)	112

PROCESSORS - 4700 PC VERSION

Requires 4700 PC Application Services, FC 4406.

Supports a number of 4700 printers, keyboards, and magnetics devices.

5160-470 a	IBM PC/XT System Unit (256KB) w/107-key administrative keyboard (=4700 FC 4607), 4700 FCS Input Option, one Dual-Sided Diskette Drive (no Async adapter)	3065
6361605	4700 PC Hardware Maintenance and Service Manual	??
6049 a	FCS Input Option, non-PC/AT (attach 4700 keyboards, mag. stripe readers, remote IPL requires 3278/79 emulation adapter)	650
6065 a	FCS Input Option, PC/AT (attach 4700 keyboards, mag. stripe readers, remote IPL requires 3278/79 emulation adapter)	650
6052 a	FCS Output Option, non-PC/AT (attach 4700 printers, re-direct PC output to 4700)	625
6068 a	FCS Output Option, PC/AT (attach 4700 printers, re-direct PC output to 4700)	625
6054 a	FCS Security Option, non-PC/AT (Set master and session keys, encryption interface program)	550
6069 a	FCS Security Option, PC/AT (Set master and session keys, encryption interface program)	550

Also supports the following 5160 and 5170 options:

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
•	IBM 4201 - Proprinter	
•	IBM 5151 - Monochrome Display	
•	IBM 5152 - Printer	
•	IBM 5153 - Color Display	
•	IBM 5154 - Enhanced Color Display	
•	0202 - 256KB Memory Module Kit (PC/AT)	
•	0203 - 512KB Memory Expansion Option (PC/AT)	
•	0205 - 20MB Fixed Disk Drive (PC/AT)	
•	0206 - High Capacity Diskette Drive (PC/AT)	
•	0207 - Dual-Sided Diskette Drive (PC/AT)	
•	0209 - 128KB Memory Expansion Option (PC/AT, Input and Security Options only)	
•	0210 - 30MB Fixed Disk Drive (PC/AT)	
•	0211 - Math Co-Processor (PC/AT)	
•	0215 - Serial/Parallel Adapter (PC/AT)	
•	0217 - Serial Adapter Cable (PC/AT)	
•	0218 - Floor Standing Enclosure (PC/AT)	
•	0220 - Prototype Adapter (PC/AT)	
•	0242 - Serial Adapter Connector (PC/AT)	
•	1003 - 64KB Memory Module Kit (non-PC/AT)	
•	1013 - 64/256KB Memory Expansion Option (non-PC/AT)	
•	1200 - Enhanced Graphics Adapter	
•	1201 - Graphics Memory Expansion Card	
•	1203 - Graphics Memory Module	
•	2074 - Asynchronous Communication Adapter (non-PC/AT)	
•	2500 - 10MB Fixed Disk (non-PC/AT)	
•	2501 - Fixed Disk Adapter (non-PC/AT)	
•	2507 - 3278/79 Emulation Adapter	
•	2887 - Display Station Emulation Adapter	
•	3810 - 5.25in Double-Sided Diskette Drive	
•	4900 - Monochrome Display and Printer Adapter	
•	4910 - Color/Graphics Monitor Adapter	
•	5200 - Printer Adapter (non-PC/AT)	
•	6052 - 4700 FCS Output Option (non-PC/AT)	
•	6054 - 4700 FCS Security Option (non-PC/AT)	

PROCESSORS - TEMPEST PC VERSIONS AND OPTIONS

The following TEMPEST systems are composed of a system unit with a model 4451 TEMPEST Monochrome Display.

4450----	TEMPEST PC System Unit/Display 'TPC1' (192KB) w/TEMPESTed keyboard, monochrome display adapter, two Dual-Sided Diskette drives, Async adapter, SDLC Communications adapter, and RS232C Serial Printer Adapter	
	Commercial price	5995
	Government price	5035

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
	The following TEMPEST systems are composed of a system unit with a model 4451 TEMPEST Monochrome Display.	
4455----	TEMPEST PC/XT System Unit/Display 'TPC2-1' (256KB) w/TEMPEST keyboard, monochrome display/printer adapter, Dual-Sided Diskette drive, and 10MB Fixed Disk drive	
	Commercial price	7640
	Government price	6112
4455----	TEMPEST PC/XT System Unit/Display 'TPC2-2' (256KB) w/TEMPEST keyboard, monochrome display/printer adapter, Dual-Sided Diskette drive, and 2 5MB Removable Disk drives	
	Commercial price	9515
	Government price	7612
100A496	Additional 5MB Disk Cartridge	
	Commercial price	243
	Government price	136
4455----	TEMPEST PC/XT System Unit/Display 'TPC2-3' (256KB) w/TEMPEST keyboard, monochrome display/printer adapter, two Dual-Sided Diskette drives	
	Commercial price	7340
	Government price	5872
	The following TEMPEST systems are composed of a system unit with a TEMPEST Color Display.	
4455----	TEMPEST PC/XT System Unit/Display 'TPC2-4' (256KB) w/TEMPEST keyboard, color display adapter, printer adapter, Dual-Sided Diskette drive, and 10MB Fixed Disk drive	
	Commercial price	8978
	Government price	7182
4455----	TEMPEST PC/XT System Unit/Display 'TPC2-5' (256KB) w/TEMPEST keyboard, color display adapter, printer adapter, Dual-Sided Diskette drive, and 2 5MB Removable Disk drives	
	Commercial price	10853
	Government price	8682
100A496	Additional 5MB Disk Cartridge	
	Commercial price	243
	Government price	136
4455----	TEMPEST PC/XT System Unit/Display 'TPC2-6' (256KB) w/TEMPEST keyboard, color display adapter, printer adapter, two Dual-Sided Diskette drives	
	Commercial price	8678
	Government price	6942

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
The following are commercial prices for additional TEMPESTed features for the TPC2 models.		
	256KB Memory Expansion	476
	8087 Co-Processor	223
	3278/79 Emulation Adapter	1825
	Async Communications Adapter	195
	SDLC Communications Adapter	314
	2nd Parallel Printer Adapter	253
The following are government prices for additional TEMPESTed features for the TPC2 models.		
	256KB Memory Expansion	333
	8087 Co-Processor	156
	3278/79 Emulation Adapter	1460
	Async Communications Adapter	156
	SDLC Communications Adapter	251
	2nd Parallel Printer Adapter	202
The following TEMPEST systems are composed of a system unit with a TEMPESTed 5272 Color Display. They are NOT AVAILABLE to non-GSA customers.		
4456----	TEMPEST 3270-PC System Unit/Display 'TPC3' (640KB) w/TEMPESTed keyboard, color display adapter, printer adapter, Dual-Sided Diskette drive, and 2 5MB Removable Disk drives	
	Government price	11195
100A496	Additional 5MB Disk Cartridge	
	Government price	136
4459----	TEMPEST PC/AT System Unit/Display 'TPC4-1A' (512KB) w/TEMPESTed keyboard, EGA, 4451 Mono Display, 360KB Diskette Drive	
	Commercial price	9591
	Government price	7673
4459----	TEMPEST PC/AT System Unit/Display 'TPC4-1B' (512KB) w/TEMPESTed keyboard, EGA, 4451 Mono Display, 1.2MB Diskette Drive	
	Commercial price	9633
	Government price	7706
4459----	TEMPEST PC/AT System Unit/Display 'TPC4-2A' (512KB) w/TEMPESTed keyboard, Mono Display/Printer Adapter, 4451 Mono Display, 360KB Diskette Drive	
	Commercial price	9295
	Government price	7436
4459----	TEMPEST PC/AT System Unit/Display 'TPC4-2B' (512KB) w/TEMPESTed keyboard, Mono Display/Printer Adapter, 4451 Mono Display, 1.2MB Diskette Drive	
	Commercial price	9295
	Government price	7436

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
4459----	TEMPEST PC/AT System Unit/Display 'TPC4-3A' (512KB) w/TEMPESTed keyboard, EGA, 4461 Enhanced Color Display, 360KB Diskette Drive Commercial price	11466
	Government price	9173
4459----	TEMPEST PC/AT System Unit/Display 'TPC4-3B' (512KB) w/TEMPESTed keyboard, EGA, 4461 Enhanced Color Display, 1.2MB Diskette Drive Commercial price	11508
	Government price	9206

The following are commercial prices for additional TEMPESTed features for the TPC4 models.

20MB Fixed Disk Drive	1095
1-10MB Internal Removable Cartridge Disk Drive	2088
2-10MB Internal Removable Cartridge Disk Drives	3600
Serial/Parallel I/O Adapter	484
128KB RAM Expansion	350
512KB RAM Expansion (2 max.)	295
Militarized Advanced Communication Controller (AdCom 2-M)	1594
Memory Expansion Option--Graphics	199
Memory Module--Graphics	259
80287 Co-Processor	375

The following are government prices for additional TEMPESTed features for the TPC4 models.

20MB Fixed Disk Drive	712
1-10MB Internal Removable Cartridge Disk Drive	1670
2-10MB Internal Removable Cartridge Disk Drives	2880
Serial/Parallel I/O Adapter	387
128KB RAM Expansion	227
512KB RAM Expansion (2 max.)	192
Militarized Advanced Communication Controller (AdCom 2-M)	1275
Memory Expansion Option--Graphics	129
Memory Module--Graphics	168
80287 Co-Processor	244

The following TEMPESTed products are available to governmental and commercial customers. The system units DO NOT include a display.

5171-168 a	IBM PC/AT System Unit TEMPESTed (512KB) w/ 8MHz 80286, Enhanced Keyboard, Clock/Calendar, High-Capacity Diskette Drive, Disk Adapter, Serial/Parallel Adapter	5995
5171-339 a	IBM PC/AT System Unit TEMPESTed (512KB) w/ 8MHz 80286, Enhanced Keyboard, Clock/Calendar, High-Capacity Diskette Drive, 30MB Fixed Disk and Adapter, Serial/Parallel Adapter	7395

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
3003 a	IBM Monochrome Display and Printer Adapter, TEMPESTed (Supports 5167)	950
5167-001 b	IBM Monochrome Display TEMPESTED (11.5in Diagonal) (2 color, 80 character x 25 line, 720H x 350V resolution, .25 Megapixel, 9x14 character cell)	750
5169-002 f	Quietwriter Printer T Model 2 (Like Quietwriter Model 2, adds TEMPEST certification, req. cable FC 3009) See TM 5201 for printer options	4950
3009 a	IBM Personal Printer Cable T (TEMPESTed cable for parallel printers)	130

PROCESSORS - INDUSTRIAL VERSIONS

The IBM Industrial Computers and Displays are available on the IBM Industrial Computer Volume Procurement Amendment.

7531-041	IBM PC/AT System Unit (6MHz, 512KB) Hardened, w/Hardened Keyboard and one High-Capacity Diskette drive	6145
7532-041	IBM PC/AT System Unit (6MHz, 512KB) Hardened, 19in rack mountable, w/Hardened Keyboard and one High-Capacity Diskette drive	6370
6019	20MB Fixed Disk Drive (Customer Setup)	1695
6045	20MB Fixed Disk Drive (Plant Installed)	1475
6038	High Capacity Diskette Drive	275
6039	Dual-Sided Diskette Drive	225
6001	Combination Adapter Cable	75
6020	Combination Adapter II, Async adapter, parallel printer adapter, timer, thermal sensor	450
6023	Rack Mounting Slides (7532 only)	47
6024	Keyboard Mounting Kit (7532 only)	180
6025	Display Mounting Kit (7532 only)	350
6040	128KB Memory Board (Attaches to Combination Adapter II)	415
6044	Display Mounting Parts Kit (7532 only)	4

The 7531 and 7532 also support the following PC/AT options:

- 0203 - 512KB Memory Expansion Option
- 0209 - 128KB Memory Expansion Option
- 0211 - Math Co-Processor Option
- 0213 - PC Network Adapter (and associated cabling components)
- 0215 - Serial/Parallel Adapter (and associated cable and connector)
- 0220 - Prototype Adapter
- 1200 - Enhanced Graphics Adapter
- 1201 - Graphics Memory Expansion Card
- 1203 - Graphics Memory Module
- 1204 - Binary Synchronous Communications Adapter
- 1205 - SDLC Communication Adapter
- 1206 - PC Cluster Adapter (and cables)

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
• 1502	- Data Acquisition and Control Adapter (and distribution panel)	
• 1503	- General Purpose Interface Bus Adapter	
• 4910	- Color/Graphics Monitor Adapter	
7552-040	IBM PC/AT System Unit (10MHz, 512KB) Hardened, for use without keyboard or display via Remote Terminal Interface	6770
7552-140	IBM PC/AT System Unit (10MHz, 512KB) Hardened, 10MB fixed disk for use without keyboard or display via Remote Terminal Interface	9370
6070	80287 Math Co-Processor for 7552	530
6072	Battery for 7552 (Power to system for 10 sec. of operation during power failure, mutually exclusive with FC6073)	180
6073	External Voltage Module for 7552 (Mutually exclusive with FC6072)	330
6074	Memory Adapter for 7552 (512KB included, accepts up to 3MB via FC6075)	1100
6075	512KB Memory Expansion for 7552	250
6076	Card Shroud for 7552 (Spare)	110
6077	IBM PC Feature Adapter for 7552 (One required for each PC feature card to be installed, mates PC feature to card shroud)	195
6080	Disk/Diskette Adapter Module for 7552 (Supports up to 2 10MB Fixed Disks and 1 720KB 3.5in Diskette, standard in 7552-140)	1400
6081	Diskette Drive for 7552 (720KB, 3.5in)	375
6082	10MB Fixed Disk Drive for 7552 (Maximum 2, 1 Standard in 7552-140)	1330
6094	Prototype Card for 7552	245
6095	Memory Adapter and Card Shroud for 7552 (Combines FC6074, FC6076)	1210
6096	Filters for 7552	35
6097	Keyboard Rack Mount Hardware for 7552	680
6098	Floor Mount Kit for 7552	600
6078	Remote Terminal Interface for 7552 (Via program 5601-053, allows remote Industrial Computer to provide terminal and program load functions thru keyboard port)	500
6221	SPECIFY CODE, FC6078 installed in a 5531	N/C
6222	SPECIFY CODE, FC6078 installed in a 7531 or 7532	N/C
6223	SPECIFY CODE, FC6078 installed in a 7552	N/C

The 7552 also supports the following PC/AT options, via feature 6077 (the PC Adapter):

- 0213 - PC Network Adapter (and associated cabling components)
- 0215 - Serial/Parallel Adapter (and associated cable and connector)
- 1200 - Enhanced Graphics Adapter
- 1201 - Graphics Memory Expansion Card
- 1203 - Graphics Memory Module
- 1204 - Binary Synchronous Communications Adapter

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
• 1205	- SDLC Communication Adapter	
• 1502	- Data Acquisition and Control Adapter (and distribution panel)	
• 1503	- General Purpose Interface Bus Adapter	
• 3390	- IBM Token-Ring Network PC Adapter (and cable)	
• 5063	- IBM Token-Ring Network PC Adapter II	
• 6050/6160	- Real Time Interface Co-Processor (ARTIC, and support cards)	
The following displays are also supported:		
• 5532	- Industrial Color Display	
• 7534	- Industrial Graphics Display	
5531-011	IBM PC/XT System Unit (256KB) Hardened, w/Hardened Keyboard, one Dual-Sided Diskette drive, and Serial / Parallel / Clock Card (separate VPA)	2975
6000	Combination Adapter	445
6001	Combination Adapter Cable	75
6002	Keylock Option Kit	10
6017	10MB Fixed Disk Drive, Adapter, and Cable (Factory Installed)	1355
6018	10MB Fixed Disk Drive, Adapter, and Cable (Customer Setup)	1520

Also supports the following PC options:

• 0213	- PC Network Adapter (and associated cabling components)	
• 1002	- Math Co-Processor Option	
• 1003	- 64KB Memory Module Kit	
• 1013	- 64/256KB Memory Expansion Option	
• 1200	- Enhanced Graphics Adapter	
• 1201	- Graphics Memory Expansion Card	
• 1203	- Graphics Memory Module	
• 1204	- Binary Synchronous Communications Adapter	
• 1205	- SDLC Communication Adapter	
• 1206	- PC Cluster Adapter (and cables)	
• 1502	- Data Acquisition and Control Adapter (and distribution panel)	
• 1503	- General Purpose Interface Bus Adapter	
• 1509	- PC/XT/370 Option Kit	
• 2074	- Asynchronous Communication Adapter	
• 2507	- 3278/79 Emulation Adapter	
• 2879	- Enhanced Display Station Emulation Adapter (and cable)	
• 2880	- Enhanced 5250 Emulation Installation Convenience Kit	
• 3810	- 5.25in Double-Sided Diskette Drive	
• 4910	- Color/Graphics Monitor Adapter	
5532----	Industrial Color Display	850
7534-001	Enhanced Industrial Color Display (Ruggedized version of 5154, sep. VPA, req. FC1200)	1175
6034	Installation and Operation Guide, 7534	10
6026	Shaded Screen Cover for 7534	83
6027	Optically Coated Glass Cover for 7534	99

PROCESSORS - PC CONVERTIBLE

The Enhanced LCD Display is standard on all PC Convertibles shipped beginning January 26, 1987.

For a special promotional offering on the following item, see "Special Promotion for the IBM 5140 PC Convertible" on page 1.

5140-002 a IBM PC Convertible (256KB) w/Integrated 78-Key Keyboard, Enhanced LCD Screen, two 3.5in Diskette Drives, 80C88 Processor, AC Adapter, Battery Pack, Applications, Diagnostics, Guide to Ops. 1695

For a special promotional offering on the following item, see "Special Promotion for the IBM 5140 PC Convertible" on page 1.

5140-022 a IBM PC Convertible (256KB) w/Integrated 78-Key Keyboard, Enhanced LCD Screen, two 3.5in Diskette Drives, 80C88 Processor, AC Adapter, Battery Pack, Diagnostics, Guide to Ops. 1675

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
--------------	-------------	-------

In addition to the options listed below, the PC Convertible supports:

•	4201 - IBM Proprinter	
•	4863 - IBM PCjr Color Display	
•	5152 - IBM Graphics Printer	
•	5153 - IBM PC Color Display	
•	5841 - IBM 1200bps Modem	
•	0020 - PCjr Connector for TV	
•	0021 - PCjr Adapter Cable for PC Color Display	
•	2067 - Communications Adapter Cable	
•	5612 - Parallel Printer Cable	
	6010 a Enhanced LCD Display (retrofit, standard in all Convertibles shipped after January 26, 1987)	250
	6030 a 256KB Memory Card (maximum 2 installable)	345
	4005 a 128KB Memory Card (maximum 2 installable)	160
	4010 a Printer, attaches to back of system unit, 40CPS serial thermal or thermal transfer, sheet or roll paper	295
	4055 a Printer Cable, 22in, allows detached connection with FC4010	45
	4015 a Serial/Parallel Adapter, attaches to back of system unit	80
	4026 a Enhanced Internal Modem, 300 and 1200 baud, 'AT' and IBM command set, mounts in system unit	450
	4025 a Internal Modem, 300 and 1200 baud, IBM command set, mounts in system unit	225
	4020 a CRT Display Adapter, attaches to back of system unit, connects 4683, 5144, 5145, or 5153, or TV set (AC only)	255
	5144-001 b PC Convertible Monochrome Display (9in diagonal, 2 color, 640H x 200V resolution, 80 character x 25 line, .13 megapel, 8x8 character cell, AC only)	180
	5145-001 b PC Convertible Color Display (13in diagonal, 320H x 200V resolution, .06 megapel, speaker, AC only)	400
	4040 a IBM PC Convertible Speech Adapter	495
	59X9966 Speech Adapter Installation and Problem Determination Procedures, Guide to Writing BASIC Speech Programs	??
	4060 a Battery Charger (trickle charger, not for concurrent operation)	25
	4065 a Automobile Power Adapter	25
	4090 a Carrying Case, Standard (soft-sided, accomodates system unit, attached printer, accessories, supplies)	84
	4095 a Carrying Case, Compact (soft-sided, system unit in main compartment, printer and accessories in expandable pocket)	44

3327 a	20MB Fixed Disk Adapter, PC/XT	200
3363-A01 b	External Optical Disk Drive (200MB, removable media, write once) (attaches to PC, PC/XT, PC/AT, 8530) (2Q87)	2950
0206 a	High Capacity (1.2MB) Diskette Drive, PC/AT	275
0207 a	Dual-sided Diskette Drive (360KB), PC/AT	225
0357 a	Internal Diskette Drive, 3.5in for 8MHz PC/AT and PC/XT 286 (720KB), not supported as drive A or with 4865-2	170
0205 a	20MB Fixed Disk Drive, PC/AT	W/D
0210 a	30MB Fixed Disk Drive, PC/AT	1795
0468 a	Upgrade PC/AT BIOS, add 30MB drive	1795

TAPE BACKUP DEVICES

4156 a	6157 Tape Attachment Adapter, PC	350
0842 A	SY-TOS/IBM 6157 Tape Utilities V.2.0 (backup/restore, library utilities driving 6157 from 8530, 8550, 8560, 8580), Test Period 2 months (9/87)	100
0955 A	SY-TOS/IBM 6157 Tape Utilities V.1.0 (backup/restore, library utilities driving 6157 from PC, XT, AT, 3270-PC)	70
1560-A01 h	Tecmar Q60H Stand-alone Tape Backup Subsystem (60MB tape)	2144
7701 b	Tecmar Q60AT Stand-alone Tape Backup Subsystem (60MB tape, mounts internal to PC/AT chassis)	1695
1561-A01 h	Tecmar Q60W20 Disk/Tape Subsystem (60MB tape, 20MB disk, not for PC/AT)	3495

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
1561-B01 h	Tecmar Q60W20AT Disk/Tape Subsystem (60MB tape, 20MB disk, PC/AT only)	3195
7700 b	Tecmar PCHOST (Tape backup units contain one attachment card, PCHOST allow attachment of subsequent PC's to same tape unit)	149
6714	Tallgrass TG-1020i Tape Backup (special bid only)	895

A REALTIME INTERFACE CO-PROCESSOR (ARTIC)

See the section on Industrial Software for listings of software supporting ARTIC.

The ARTIC Multiport card features four or eight ports with 19.2kbps async and 38.4kbps HDLC/SDLC. All eight ports may run at 9.6kbps concurrently.

6240 a	A RealTime Interface Co-Processor (ARTIC) Multiport adapter, 4 ports, 128KB, Control Program on 5.25in diskette (10/87)	1060
6241 a	A RealTime Interface Co-Processor (ARTIC) Multiport adapter, 4 ports, 128KB, Control Program on 3.5in diskette (10/87)	1060
6242 a	512KB Memory Expansion for ARTIC Multiport, replaces base 128KB with 512KB (10/87)	285
6245 a	Four-Port Expansion for ARTIC Multiport, provides 4 additional RS-232/V.24 ports (10/87)	180
6246 a	EIA RS-232 Multiport Interface Cable for ARTIC Multiport, 1 78-pin connector to 8 25-pin connectors, 10/87)	210
6058 a	IBM Realtime Interface Co-Processor (ARTIC) Multiport, Technical Reference	185
6059 a	IBM Realtime Interface Co-Processor (ARTIC) Multiport, Hardware Maintenance and Service	100

The ARTIC card features two serial ports with a max speed of 64kbps on one, 19.2kbps on the other. Max of 2 interface cards per ARTIC.

6050 a	A RealTime Interface Co-Processor (ARTIC) driver card for multiple industrial programmable controllers, 128KB, Control Program on 5.25in diskette	1295
6165 a	A RealTime Interface Co-Processor (ARTIC) driver card for multiple industrial programmable controllers, 128KB, Control Program on 3.5in diskette (5160, 5170 only)	1295
6160 a	A RealTime Interface Co-Processor (ARTIC) driver card for multiple industrial programmable controllers, 512KB, Control Program on 5.25in diskette	1695

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6166 a	A RealTime Interface Co-Processor (ARTIC) driver card for multiple industrial programmable controllers, 512KB, Control Program on 3.5in diskette (5160, 5170 only)	1695
6051 a	EIA RS-232C/CCITT V.24 Interface Board for ARTIC	130
6064 a	EIA RS-422A Interface Board for ARTIC	245
6053 a	CCITT V.35 Interface Board for ARTIC	210
6066 a	20mA Current Loop Interface Board for ARTIC	190
6055 a	128KB Memory Expansion for ARTIC (for FC6050 and 6165 only)	175
6161 a	512KB Memory Expansion for ARTIC (for FC6160 and 6166 only)	300
6056 a	RS-232C Direct Attach Interface Cable, 2m, for ARTIC	100
6057 a	RS-232C Modem Attach Interface Cable, 2m, for ARITC	115
6061 a	CCITT V.35 Interface Cable, 2m, for ARTIC	200
6058 a	Technical Reference Manual, ARTIC	185
6059 a	Hardware Maintenance and Service Manual, ARTIC	100

GENERAL PURPOSE INTERFACE BUS ADAPTER

1503 a	IBM PC General Purpose Interface Bus (14-device IEEE-488, 300KB DMA rate) (Use FC 3907, which includes a cable, to order the IEEE-488 Adapter for 5371 models.)	295
4201 A	IBM PC General Purpose Interface Bus (IEEE-488) Programming Support	89

DATA ACQUISITION/CONTROL ADAPTER

See also Labtech Notebook, FC 9586.

1502 a	IBM PC Data Acquisition/Control Adapter (4-A/D @ 15k/sec, 2-D/A @ 25k/sec, both 12-bit, 16-channel digital TTL I+O @ 25k/sec)	975
1504 a	IBM PC Data Acquisition/Control Distribution Panel	190
4202 A	IBM PC Data Acquisition/Control Adapter Programming Support	175

See also Labtech Notebook, FC 9586, for additional DACA support

KEYBOARDS

6279940	Keyboard Template (3, for Enhanced Keyboard)	4.95
---------	--	------

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6341707	Clear Keycaps (60, with paper inserts, for Enhanced Keyboard)	50
6341704	Paper Inserts for Clear Keycaps (300)	30
1351710	Blank Light Keycaps (60, for Enhanced Keyboard)	25
1351728	Blank Dark Keycaps (60, for Enhanced Keyboard)	25
1351717	Keycap Removal Tool (6, for Enhanced Keyboard)	11

MISCELLANEOUS

6011 a	IBM PC Music Feature (336 voices available, 8 played simultaneously)	495

5798-DZD	Videotex/370 V.2, CICS SNA and X.25 Videotex preparation and presentation, works with PC/Videotex-Graphic Artist Facility, PC/Colorview, PC/Videotex, Central service to 12/89	85000

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5798-DTW	Videotex/370, CICS SNA and X.25 support for Videotex preparation and presentation, works with PC/Videotex-Graphic Artist Facility (VTXGRAF), PC/Colorview, and PC/Videotex, Central service to 9/87	75000
5003 a	Personal System/2 Data Migration Facility (moves data one way from PC to Personal System/2, req. parallel adapter and cable on sending system)	33

NETWORK MANAGEMENT (GENERAL)

5669-024	NetView/PC, support for non-SNA devices (Token-Ring, Rolm CBX, non-IBM), Alerts sent to Netview, remote console, req. ARTIC card, Warranted, Central Service 6 mo. notice or to 12/91 (2Q87)	2000
52205	NetView/PC ROLM Alert Monitor, NetView/PC application to monitor ROLM CBX, some non-ROLM PBX's (Order from ROLM, 3Q87) Central Service to 12/91	6500
52200	NetView/PC ROLM Call Detail Collector, NetView/PC application to do call accounting on ROLM CBX, some non-ROLM PBX's (Order from ROLM, 3Q87) Central Service to 12/91	6500

See also the Token-Ring Network Manager V.1.1, which can operate with NetView/PC to provide remote management of Token-Ring Networks

ENHANCED CONNECTIVITY FACILITIES

Enhanced Connectivity Facilities support the Server Requester Programming Interface (SRPI) and require MVS/XA TSO/E R.3 or VM/SP R.4. in the host.

SRPI requires 3270-PC Control Program V.3 or PC 3270 Emulation Program V.3 in the PC or 3270-PC.

SC23-0959	IBM Programmer's guide to the Server-Requester Programming Interface (SRPI) for the IBM PC and IBM 3270 PC	25
5664-327	IBM CMS Servers/Requesters for SRPI (3Q87), req. VM/SP R.4, Warranted, Central Service 6 mo. notice (monthly charge, also available for graduated one-time charge)	850

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5665-396	IBM TSO/E Servers/Requesters for SRPI (3Q87), req. TSO/E R.3 and MVS/XA, Warranted, Central Service 6 mo. notice (monthly charge)	1350
--	Upgrade Attachment/370+ to IBM PC Requesters	188
6066 A	Host Data Base View Facility (HDBV) V.2, get data from IC/1(VM), QMF, TIF, AS, format for DIF, Filing Assistant, PDS, Symphony, 123, dBase, Multiplan, or print, uses SRPI or Mainframe Commo Asst	495
6091	Upgrade HDBV V.1 to V.2	125

ASYNCHRONOUS

GENERAL

For sharing of asynchronous ports as Network resources, see the Asynchronous Communications Server Program (FC 2003).

See also the Multiprotocol Communications Adapter for Async, BSC, and SDLC communications (FC 8001).

4805 a	IBM 75-1200bps Internal Async Modem (short card)	499
4829 a	IBM 75-2400bps Internal Async Modem (short card)	569
SA27-3739	Guide to Operations, 2400bps Internal Modem	35
SA27-3740	Technical Reference, 2400bps Internal Modem	30
SA27-3741	Hardware Maintenance and Service, 2400bps Internal Modem	60
2074 a	ASYNCH Adapter (included with fixed-disk models of the PC/XT)	70
7619	AST-FourPort/XN Communications Board (4 RS-232 ports to 9600 baud, cable included, for Xenix in PC/AT) (special bid only)	495
4032 A	Asynchronous Communications Support V.2	65
0604 A	ADDITIONAL LICENSE, Asynchronous Communications Support V.2	??
9226 A	PC/Colorview (Videotex), Central service for 90 days or to 4/87	115
4206 A	IBM PC Graphics Terminal Emulator (Tektronix 4010/4100 protocols, ADM3A) (W/D 5/8/87)	319
0914 A	PC/Host (3270 emulation, background file transfer, terminal and printer sessions plus PC hotkey, req. 3708 w/FC3524 or 3710 and host 3270-PC File Transfer Program)	200

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
4100 A	IBM PC Personal Communications Manager (W/D 5/8/87)	109
6276538 #	Portfolio Management System (communicate with Dow Jones)	99.95

MODEL/FC VPA	DESCRIPTION	PRICE
7036 A	IBM Interconnect Program, connect PC Net-PC Net, PC Net-Token-Ring, Central service to 6/30/87, req. Token-Ring NETBIOS Program with Token-Ring Net **	495
8391 A	IBM Local Area Network Asynchronous Connection Server Pgm, up to 32 sess on dedicated gateway, Token and PC Net (3.5in+5.25in) Test Period 2 months, Warranted, Central Service to 12/88 (12/87)	1200
2003 A	IBM Asynchronous Communications Server Program for the IBM Token-Ring Network and PC Network	495
9396	IBM Local Area Network PrintManager (shares 3820 printer, also for Corvus Omninet) Central service to 9/86	800
6276586 #	PC Network Remote Control (run programs on other LAN PC's, view other PC's displays, for any NETBIOS LAN)	24.95
6276562 #	PC Network Remote Control (6 copies)	99
7771 A	IBM Remote NETBIOS Access Facility (telephone access to server, network functions from remote PC, for any NETBIOS LAN, runs both in gateway and remote PC)	195
8910 A	IBM LAN Manager V.1.0 for Token-Ring or broadband PC Net, manages multi-ring networks (5.25in+3.5in) Test Period 2 months, Warranted, Central Service to 6/89 ** (12/87)	1995
8913	IBM LAN Manager Upgrade, upgrade IBM Token-Ring Network Manger to LAN Manager V.1.0 (12/87, through 9/88)	500
8873 A	IBM PC 3270 Emulation LAN Management Program V.1.0, resides in PC 3270 Emulation gateway, manages small remote ring, (5.25in+3.5in) Warranted, Central Service to 6/89 ** (12/87)	995
9691 A	NetWare Bridge by Novell * (interconnect PC Net, Cluster) V.2.0A	395
9689 A	Novell Advanced NetWare/86 * V.2.0A	1595
9780	Novell Advanced NetWare/286 * V.2.0A (Non-Dedicated)	2195
9766	Novell Advanced NetWare/286 * V.2.0A (Dedicated)	2195
4159 A	IBM PC Classroom LAN Administration System (CLASS), V.1.0 (Installation aid for IBM education software under Netware/86 program)	995

IBM TOKEN-RING NETWORK

See "Single Shipment Volume Offering (PC and Token-Ring Networks)" on page 12 for the terms of the Single Shipment Volume Discount Offering for the Token-Ring Network PC Adapter.

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
8228-KT1	IBM Token-Ring Network Starter Kit (1-8228, 1-Component Housing, 4-TR PC Adapter, 4-TR PC Cable, 4-30ft. Jumper Cable, 4-TR NETBIOS Pgm, 4-TR LAN Pgm, TR Starter Kit Guide) (W/D 7/2/87)	4065
SK2T-0299	IBM Token-Ring Network Starter Kit Guide	34.50
8228-KT2	IBM Token-Ring Network Starter Kit (1-8228, 1-Component Housing, 4-TR PC Adapter, 4-TR PC Cable, 4-30ft. Jumper Cable, 4-LAN Support Pgm, 4-LAN Pgm 1.2, TR Starter Kit Guide) (5/87)	4350
SK2T-0303	IBM Token-Ring Network Starter Kit Guide, 2nd Edition (5/87)	55
3391 a	IBM Token-Ring Network PC Adapter	695
0370	8 Token-Ring Network PC Adapters, Single-Shipment Volume Offering	4726
0371	20 Token-Ring Network PC Adapters, Single-Shipment Volume Offering	11398
83X7839	Remote Program Load (RPL) EPROM RPQ to do remote IPL via Token-Ring Adapter FC 3391 (also called RPQ 8Q0561) fits in socket on adapter, req. RPQ FC PX0027 or equivalent in server	80
5063 a	IBM Token-Ring Network PC Adapter II, Required for Industrial PC, Token-Ring Bridge, and S/36 Attachment	895
3390 a	IBM Token-Ring Network PC Adapter Cable	35
83X7839	Remote Program Load (RPL) EPROM RPQ to do remote IPL via Token-Ring Adapter II FC 5063 (also called RPQ 8Q0561) fits in socket on adapter, req. RPQ FC PX0027 or equivalent in server	80
6042	IBM Token-Ring Network PC Adapter Diskette (3.5in) provides adapter handler Adapter and Adapter II for 8530, included with adapters after April 2, 1987)	N/C
6043	IBM Token-Ring Network PC Adapter Hardware Maintenance and Service Addendum for 8530	20
	See also the Advanced Program-to-Program Communication Program (FC 7038) for support of SNA LU 6.2 on the Token-Ring Network	
7037 A	IBM Token-Ring NETBIOS Program, Central service to 6/30/87 (W/D 7/10/87)	35
0910 A	IBM Token-Ring NETBIOS Program, V.1.1 (Adds support for attachment of 3270-PC to Token-Ring, 3.5in+5.25in) Warranted, Central service to 12/87 ** (W/D 7/10/87)	35
7860 A	IBM Token-Ring Network Bridge Program V.1.1, adds centralized multi-ring LAN management, (3.5in+5.25in) Test Period 2 months, Central Service 90 days notice or 6/89 **	1495

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
8880 A	Upgrade Token-Ring Network Bridge Program V.1.0 to V.1.1 (through 9/30/88)	130
0908 A	IBM Token-Ring Network Bridge Program V.1.1, Creates bridges between rings, Central Service 90 days notice or 12/87 **	1495
6041 A	IBM Token-Ring Network Bridge Installation Kit, Incl. program, 2 Adapter-IIIs	3285
0907 A	IBM Token-Ring Network Manager (problem determination, error recovery) Central Service 90 days notice or to 12/87 ** (W/D 7/10/87)	1495
0931 A	IBM Token-Ring Network Manager V.1.1 (problem determination, error recovery), can work with NetView/PC, Warranted, Central Service to 12/88 (2Q87) **	1495
0933	Upgrade Token-Ring Network Manager V.1 to V.1.1 (2Q87)	75
For S/36 LAN Communications, see also PC Support/36 which is required for LAN connection		
3098 a	System/36 LAN Attachment Adapter (extra, for gateway PC/AT, note that FC 3098 is also shipped as part of 536X LAN Attachment Feature) (2Q87)	600
5727-LC1	IBM System/36 5360/5362 LAN Communications (links S/36, Token-Ring via dedicated PC/AT, supports 5250 and 3278 emulation via PC Support/36) Warranted, Central Service 6 mo. notice (2Q87)	
4404	Monthly Charge Option	75
4403	One-Time Charge Option	925
9520	DSLO One-Time Charge	814
5727-LC6	IBM System/36 5364 LAN Communications, Warranted, Central Service 6 mo. notice (2Q87)	
4122	One-Time Charge Option	695
9887	DSLO One-Time Charge	521

3823 A	Video/PASSAGE Authoring System V.1.0 Warranted, Central Service for 90 days or to 3/89	7200
3822 A	Video/PASSAGE Presentation System V.1.0 Warranted, Central Service for 90 days or to 3/89	265
6086 A	Video/PASSAGE Authoring System V.1.1 (2Q87) Adds support for 2 videodisk players via IEEE-488, Warranted, Central Service for 90 days or to 3/89	7200
6087 A	Video/PASSAGE Presentation System V.1.1 (2Q87) Adds support for 2 videodisk players via IEEE-488, Warranted, Central Service for 90 days or to 3/89	265

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6088	Video/PASSAGE Authoring Upgrade Kit to V.1.1 (2Q87)	95
6089	Video/PASSAGE Presentation Upgrade Kit to V.1.1 (2Q87)	35
6094 A	InfoWindow PILOT - Authoring (develop courseware for InfoWindow) Central Service to 1Q89	2050
6095 A	InfoWindow PILOT - Presentation Central Service to 1Q89	200
4502 M	Learning System/1 Authoring System (LS/1) Courseware authoring for use with InfoWindow	5000
4503 M	Learning System/1 Presentation System (LS/1) For use with InfoWindow	125

MICRO CADAM FOR PC/AT

5713-AAL	MICRO CADAM Convenience Kit for the PC/AT, Central Service for 90 days or to 6/3/88	
9001	Asset Registration	N/C
5868	MICRO CADAM Convenience Kit Machine-Readable Material	N/C
4470	MICRO CADAM Convenience Kit Basic License (includes program documentation, mouse, program-function keyboard, asset-protection chip, interface board)	8000
5713-AAL	MICRO CADAM Licensed Program (only) for the PC/AT, Central Service for 90 days or to 6/3/88	
9001	Asset Registration	N/C
5858	MICRO CADAM Licensed Program Machine-Readable Material	N/C
4469	MICRO CADAM Licensed Program Basic License (includes program documentation, asset-protection chip)	6025
5713-AAN	MICRO CADAM Geometry Interface Program for the PC/AT, Central Service for 90 days or to 6/3/88	
9001	Asset Registration	N/C
5858	MICRO CADAM Geometry Interface Program Machine-Readable Material	N/C
4472	MICRO CADAM Geometry Interface Program Basic License (includes program documentation, asset-protection chip)	1500
5713-AAM	MICRO CADAM Data Transfer Utility, Central Service for 90 days or to 6/3/88	
9001	Asset Registration	N/C
5858	MICRO CADAM Data Transfer Utility Machine-Readable Material	N/C

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
4471	MICRO CADAM Data Transfer Utility Basic License (includes program documentation, asset-protection chip)	1250

IBM PC STORYBOARD

4401 A	IBM PC Storyboard Plus (see also PC PicturePak), Test Period 2 months, Warranted, Central service for 90 days or to 6/89 (6/87)	350
0999 B	UPGRADE, IBM PC Storyboard to Storyboard Plus (through 3/25/88)	140
9352 A	IBM PC Storyboard (see also PC PicturePak), Warranted, Central service for 90 days or to 3/87 (W/D 7/10/87)	275
9096 A	PC PicturePak - Eye Openers (Storyboard extensions) *	195
9585 A	PC PicturePak Holidays (Storyboard images for 18 holidays) *	195
9589 A	PC PicturePak The PC Family (Storyboard images of PC hardware and software) *	195
9814 A	PC PicturePak - TypeStyles (18 Storyboard typefaces) *	195

VIRTUAL DEVICE INTERFACE

See "Redistribution of PC Software" on page 15 for information on redistributing applications containing VDI driver modules.

4205 A	IBM PC Graphical File System (ANSI metafile/GKS) (W/D 5/8/87)	189
4203 A	IBM PC Graphical Kernel System (ANSI GKS) (W/D 5/8/87)	319
0929 A	IBM PC Graphics Development ToolKit V.1.2, Test Period 2 months	495
S68X-2280	Display Adapter 8514/A 1.20 VDI Drivers for Graphics Development Toolkit V.1.2	30
0922 B	UPGRADE, Graphics Development Toolkit V.1.1 to V.1.2 (through 12/87)	250

See "Redistribution of PC Software" on page 15 for information on redistributing programs prepared using the Graphics Development Toolkit V.1.10.

0076 A	IBM PC Graphics Development ToolKit Version 1.10 (order via PCTB) (W/D 10/7/87)	495
4204 A	IBM PC Plotting System (VDI system) (W/D 5/8/87)	245

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
0456	IBM 5279 Color Display VDI 1.10 Driver (for Graphics Development Toolkit 1.10, Standalone)	N/C

INDUSTRIAL SOFTWARE

The following vendor-logo program offerings are for use with IBM 5531, 7531, and 7532 Industrial Computers.

Quantity discounts are via a separate Industrial Computer Exhibit to the QDA. QDA categories below are from that Exhibit, not the standard PC Exhibit.

5793-AGN B	!Barsoft by ASAP Systems (Barcode Label Design and Printing)	
9080 B	Asset Registration	N/C
6500 B	Barsoft Software	995
6501 B	Barsoft Manual	75
5793-AEY A	CAMM (Computer-Aided Manufacturing Management)	
9001 A	Asset Registration	N/C
6504 A	CAMM System Kit (required, prereq. for all other features)	200
6505 A	CAMM DSE Analytical Module, Standard Graphics	500
6506 A	CAMM DSE Analytical Module, Enhanced Graphics	950
6507 A	CAMMGraph Build/Display, Enhanced Graphics	4100
6508 A	CAMMGraph Display, Enhanced Graphics	1900
6509 A	Offline Controller/Setup, Allen-Bradley	500
6510 A	Offline Controller/Setup, Analogic	500
6511 A	Offline Controller/Setup, General Electric	500
6525 A	Offline Controller/Setup, Modicon	500
6526 A	Offline Controller/Setup, Texas Instruments	500
6512 A	Offline Controller/Setup, Turnbull Control Systems	500
6627 A	Floor Manager (reqd for each operator station)	1250
6629 A	Device Driver, Allen-Bradley	500
6631 A	Device Driver, Analogic	500
6632 A	Device Driver, General Electric	500
6633 A	Device Driver, Modicon	500

SUPPORT PUBLICATIONS - MANAGING END USER COMPUTING

These modules are intended for presentation by IBM Marketing Representatives as part of IBM's structured planning methodology. They are to be used in the context of a joint IBM-customer program for the development of end-user computing.

Publications listed below as no charge (N/C) are typically free when ordered in reasonable quantities from your IBM Marketing Representative.

GBOF-1689	Bill of Forms for Managing End-User Computing Series, orders all N/C manuals listed below	N/C

SUPPORT PUBLICATIONS - PC SEMINAR PROCEEDINGS

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
	Publications listed below as no charge (N/C) are typically free when ordered in reasonable quantities from your IBM Marketing Representative.	
G320-9307	IBM PC Seminar Proceedings V.1.2--DOS 2.0 and 1.1 Comparison, 8087, Compatibility Guidelines, Macro Assembler	N/C
G320-9308	IBM PC Seminar Proceedings V.1.3--DOS 2.1, 2.0, and 1.1 compared, PCjr Architecture and Compatibility, Cartridge BASIC, Personal Communication Mgr	N/C
G320-9309	IBM PC Seminar Proceedings V.2.1--Software support center, International compatibility requirements, PC Cluster Program	N/C
G320-9310	IBM PC Seminar Proceedings V.2.2--Software support center, International compatibility requirements, PC Cluster Program IBM PC Cluster	N/C
G320-9311	IBM PC Seminar Proceedings V.2.3--PC Cluster, PCjr Cartridges, Sort 1.00, FORTRAN 1.00, Pascal 2.00	N/C
G320-9312	IBM PC Seminar Proceedings V.2.4--PC/AT Architecture and Compatibility, DOS 3.0	N/C
G320-9313	IBM PC Seminar Proceedings V.2.5--IBM PC Network Overview, Hardware, NETBIOS, and Program	N/C
G320-9314	IBM PC Seminar Proceedings V.2.6--TopView	N/C
G320-9315	IBM PC Seminar Proceedings V.2.7--Professional Debug Facility	N/C
G320-9319	IBM PC Seminar Proceedings V.2.8--PC Network SMB Protocol	N/C
G320-9316	IBM PC Seminar Proceedings V.2.9--IBM PC Xenix	N/C
G320-9317	IBM PC Seminar Proceedings V.2.10--Graphical Kernel System, File System, Plotting System, Professional FORTRAN, Data Acquisition Adapter, GPIB Adapter	N/C
G320-9318	IBM PC Seminar Proceedings V.2.11--Enhanced Graphics Adapter	N/C
G320-9320	IBM PC Seminar Proceedings V.3.1--PC Information Panel (3295)	N/C
G320-9321	IBM PC Seminar Proceedings V.3.2--BASIC Compiler 2.0, memory information, modular programming, ISAM files, library manager	N/C
G320-9322	IBM PC Seminar Proceedings V.3.3--IBM PC C Compiler	N/C
G320-9323	IBM PC Seminar Proceedings V.3.4--IBM Asynchronous Communication Server Protocol	N/C
G320-9324	IBM PC Seminar Proceedings V.3.5--IBM PC Voice Communications Option	N/C
G320-9325	IBM PC Seminar Proceedings V.4.1--IBM PC Xenix V.2	N/C
G320-9326	IBM PC Seminar Proceedings V.4.1--IBM PC System Extensions (incl. DOS 3.2, LAN 1.1, PC 3270 Emulation V.2), IBM PC Enhanced Keyboard	N/C
G320-9327	IBM PC Seminar Proceedings V.4.3--IBM PC Convertible	N/C

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
G360-2697	IBM PC Seminar Proceedings V.4.4--IBM PC Interfaces, PC 3270 Presentation Space API, Advanced Program-to-Program Commo., Document Content Architecture, Enhanced Connectivity Facil., Interrupt Sharing	N/C

SUPPORT PUBLICATIONS - OPTIONS AND ADAPTERS TECHNICAL REFERENCE

The following manual covers these options and adapters:

Expansion Unit
Monochrome Display
Color Display
Monochrome Display/Printer Adapter
Color Graphics Monitor Adapter
Color Printer
Compact Printer
Parallel Printer Adapter
5.25in Diskette Drive
5.25in Diskette Drive Adapter
Asynchronous Communications Adapter
Fixed Disk Drive Adapter
64/256KB Memory Option
Slimline Diskette Drive
Graphics Printer
SDLC Adapter
Cluster Adapter
Game Control Adapter
10MB Fixed Disk Drive
Bisynchronous Communications Adapter

2509 a	IBM PC Options and Adapters Technical Reference Manual, Base (order via PCTB)	125
SS34-0007	Options and Adapters (Enhanced Graphics Adapter and Display) (order via PCTB)	13
SS34-0009	Options and Adapters (Engineering/Scientific, including Data Acq. Controller, Prof. Graphics Controller, GPIB Card) (order via PCTB)	34

SERIES/1 PC OPERATING SYSTEMS

For associated hardware, see "Processors - Series/1 Versions" on page 57. For associated Series/1 applications, see your IBM Marketing Representative.

These programs are eligible for volume license discounting under the IBM Series/1 Licensed Program Exhibit.

5719-EM1	IBM Series/1 Input Output Executive (Provides PC device support for EDX and RPS), Warranted, Central service 6 mo. notice or to 3/88	
9737	Asset registration	715
2154	Media distribution and process charge V.1.1	40

EDX on the 4950 is supported for application execution only. Application development under EDX on the 4950 is not supported.

5719-XJ5	IBM Series/1 Event Driven Executive for the IBM Series/1 4950 System Unit (Requires Series/1 I/O Executive), Warranted, Central service to 3/88	
9764	Asset registration	750
2098	Media distribution and process charge, Version 5.1	21
2177	Media distribution and process charge, Version 5.2	21

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
	RPS on the 4950 is supported for application execution only. Application development under RPS on the 4950 is not supported.	
5719-PJ7	IBM Series/1 Realtime Programming System for the IBM Series/1 4950 System Unit (Requires Series/1 I/O Executive), Warranted, Central service to 3/88	
9766	Asset registration	2800
2122	Media distribution and process charge, Version 7.1	73
2175	Media distribution and process charge, Version 7.2	73
5776-DAF	Telex Interface Program/PC (TXIP/PC) Allows Series/1 5170 to act as telex traffic node with up to 4 telex I/O lines and one DTNL host line (FC9001, 4003, 2000), Central service to 3/89	7000

VM/PC

For associated hardware, see "Processors - PC/XT/370 and PC/AT/370 Versions" on page 56.

VM/PC OPERATING SYSTEM

7040 A	IBM Virtual Machine/Personal Computer V.2.01 for PC/AT/370 ** (Incl. TR LAN support, APL char set, spool RDR/PUN/CON), Warranted, Central service 6 mo. notice or to 12/87	1150
7041	VM/PC 2 Primer	25
5664-319	IBM VM/PC Host Server V.2 (VMPCSERV) Warranted, Central Service to 12/87	
9001	Asset Registration	N/C
5558	9/1600 bpi tape	N/C
5559	9/6250 bpi tape	N/C
4650	One Time Charge Option	2000
4651	Monthly Charge Option	135
4175 A	IBM Virtual Machine/Personal Computer V.1.1 ** (Incl. user's guide, VMPCSERV, support for AT/370, 3278/9 emul.), Warranted, Central service to 12/86	1150
SC24-5254	VM/PC User's Guide (additional copy)	25
4176	VM/PC 1.1 Primer	18
G320-0576	Example of an Interface Between VM/PC CMS and a Native Input/Output Device (Interfacing VM/PC to a PC plotter, etc.)	N/C
4174	VM/PC Primer	18

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5798-DTL	TSO Host Server for PC/370 (TSOSERV), Central service to 7/86	2420
5799-CEE	VM/PC Toolkit-Base for the AT/370 (PRPQ P81010, CMS program I/O to PC graphics devices, async VMPCSERV, program to program communication with PC DOS programs)	405
5799-CED	VM/PC Toolkit-Host Programs for the AT/370 (PRPQ P81011, Async VMPCSERV on tape, Host REXX bindings in VDI syntax to GDDM)	500
5799-CEC	VM/PC Toolkit-VDI Graphics for the AT/370 (PRPQ P81014, High-level language bindings to VDI for VS FORTRAN, Pascal/VS, REXX, Assembler H for VM/PC programs)	460
SC28-1391	TSOSERV Program Description and Operations	4.50
SC28-1390	TSOSERV User's Guide	4.50

MODEL/FC VPA	DESCRIPTION	PRICE
--------------	-------------	-------

PROCESSORS - RT-PC SYSTEM

For associated software, see "IBM RT-PC Advanced Interactive Executive" on page 177.

The IBM RT Personal Computer is discounted on a separate RT-PC Volume Procurement Agreement. The VPA categories listed below apply to that agreement only.

The following RT-PC system units are floor-standing devices, with enhanced expandability.

For a special promotional offering on the following item, see "RT PC AIX Operating System Promotional Offering" on page 1.

6150-020 a RT-PC System Unit, incl. RISC Processor, RT Keyboard, 1.2MB Diskette, 40MB Fixed Disk and Adapter, 1MB Memory, 2 Async Ports	11900
---	-------

For a special promotional offering on the following item, see "RT PC AIX Operating System Promotional Offering" on page 1.

6150-025 a RT-PC System Unit, incl. RISC Processor, RT Keyboard, 1.2MB Diskette, 70MB Fixed Disk and Adapter, 2MB Memory, 2 Async Ports	14050
---	-------

For a special promotional offering on the following item, see "RT PC AIX Operating System Promotional Offering" on page 1.

6150-A25 a RT-PC System Unit, incl. RISC Processor, 1.2MB Diskette, 70MB Fixed Disk and Adapter, 2MB Memory, 2 Async Ports, 5080 Attachment	15620
---	-------

6150-125 a RT-PC System Unit, incl. higher-performance RISC Processor and floating-point processor, RT Keyboard, 1.2MB Diskette, 70MB Fixed Disk, EESDI Adapter, 4MB Fast Memory, 2 Async Ports (5/87)	16100
--	-------

6150-B25 a RT-PC System Unit, incl. higher-performance RISC Processor and floating-point processor, 5080 Attachment, 1.2MB Diskette, 70MB Fixed Disk, EESDI Adapter, 4MB Fast Memory, 2 Async Ports (5/87)	17670
--	-------

The following RT-PC system units are desktop devices, with limited expandability.

6151-010 a RT-PC System Unit, incl. RISC Processor, RT Keyboard, 1.2MB Diskette, 40MB Fixed Disk and Adapter, 1MB Memory (no additional disk drives allowed)	7900
--	------

For a special promotional offering on the following item, see "RT PC AIX Operating System Promotional Offering" on page 1.

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6151-015 a	RT-PC System Unit, incl. RISC Processor, RT Keyboard, 1.2MB Diskette, 70MB Fixed Disk and Adapter, 2MB Memory (no additional disk drives allowed)	9600
6151-115 a	RT-PC System Unit, incl. higher-performance RISC Processor and floating-point processor, RT Keyboard, 1.2MB Diskette, 70MB Fixed Disk, EESDI Adapter, 4MB Fast Memory (no additional disk drives allowed) (5/87)	10600

For a special promotional offering on the following item, see "RT PC AIX Operating System Promotional Offering" on page 1.

61X6833	Upgrade RT-PC models 010, 015, 020, 025, A25 to new processor	2495
---------	---	------

In addition to the options listed below, the RT-PC supports the following features. Excepting the Math Co-Processor, all features require an I/O slot for installation.

- 0203 - PC/AT 512KB Memory Option (used with FC 4756)
- 0206 - PC/AT High Capacity Diskette Drive
- 0207 - PC/AT Dual-Sided Diskette Drive
- 0211 - PC/AT Math Co-Processor (used with FC 4756)
- 0213 - PC Network Adapter (requires user-written programs)
- 0215 - PC/AT Serial/Parallel Adapter
- 0217 - PC/AT Communications Cable
- 0242 - PC/AT Serial Adapter Connector
- 1200, 1201, 1203 - Enhanced Graphics Adapter and Memory
- 2507, 5050 - 3278/79 Emulation Adapter
- 4900 - Monochrome Display/Printer Adapter
- 5612 - PC Printer Cable

4735 a	40MB Fixed-Disk Drive (maximum 3 drives)	1395
3428 a	PC/AT Fixed-Disk and Diskette Drive Adapter (required if a third Fixed Disk is to be configured, requires FC 8541 and an I/O slot)	650
6941	RT-PC 70MB ESDI Fixed-Disk Drive (req. FC6341)	2395
6341	RT-PC ESDI Magnetic Media Adapter (supports 2-FC6941 and 2 diskette drives)	650
3988	RT-PC 70MB Extended ESDI Fixed-Disk Drive (for model 125, B25 only) (5/87)	2395
3272	RT-PC 114MB Extended ESDI Fixed-Disk Drive (for model 125, B25) (4Q87)	3495
9332-240	RT-PC SCSI Direct Access Storage Device, 200MB, Rack Mount, Also available via monthly rental charge of \$850 (2Q87)	8500
9332-250	RT-PC SCSI Direct Access Storage Device, 200MB, Standalone, Also available via monthly rental charge of \$850 (2Q87)	8500

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
9332-440	RT-PC SCSI Direct Access Storage Device, 400MB, Rack Mount, Also available via monthly rental charge of \$1400 (2Q87)	14000
9332-450	RT-PC SCSI Direct Access Storage Device, 400MB, Standalone, Also available via monthly rental charge of \$1400 (2Q87)	14000
9822	Cable from RT-PC to first 9332 on a signal cable path (specify code on 9332, inc. terminator), 8m	N/C
9827	Cable from RT-PC to other 9332s on a signal cable path (specify code on 9332), 1m	N/C
SA21-9533	IBM 9332 (SCSI) Setting Up Manual	??
SA21-9534	IBM 9332 (SCSI) Analyzing Problems Manual	??
SA21-9535	IBM 9332 (SCSI) Reference Code Guide	??
SY31-0685	IBM 9332 (SCSI) Service Guide	??
SA21-9532	IBM 9332 (SCSI) Planning Guide	??
7000	RT-PC Small Computer System Interface Adapter for 9332 DASD, Supports attachment of up to 7 9332s (2Q87)	1080
3468	RT-PC Small Computer System Interface Adapter Cable (2Q87), 8m (additional, prefer specify code 9822 above)	95
3470	RT-PC Small Computer System Interface Device-to-Device Cable, 1m (additional, prefer specify code 9827 above) (2Q87)	75
4797 a	6157 Streaming Tape Drive Adapter, RT-PC (requires an I/O slot)	430
	The RT-PC also supports the PC/AT High-Capacity Diskette Drive (FC 0206) and the PC/AT Dual-Sided Diskette Drive (FC 0207). A maximum of 2 Diskettes Drives may be configured.	
8222 a	1MB System Memory Expansion (max. 1 additional on old models)	1445
4739 a	2MB System Memory Expansion (max. 1 additional on old models)	2545
3156 a	4MB System Memory Expansion (max. 2 on old models)	3500
7004 a	4MB Fast Memory Expansion (max. 2 on models 115, 125, B25)	3800
7008 a	8MB Fast Memory Expansion (max. 1 on models 115, 125, B25)	5000
8426 a	Mouse, 2-button	195
6815 a	Advanced Floating-Point Accelerator (IEEE standard, uses dedicated slot, 2Q87)	1995
4758 a	Floating-Point Accelerator (IEEE standard, uses dedicated slot)	850
4763 a	4-Port Asynch RS-232C Adapter (speeds to 19.2 kbps, distance to 50 feet without modem, requires I/O slot) (W/D 6/17/87)	425

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
4764 a	4-Port Asynch RS422A Adapter (speeds to 19.2 kbps, distance to 4000 feet without modem, requires I/O slot) (W/D 6/17/87)	500
1356 a	Four-Port RS-232C Adapter (16-byte buffer, replaces FC 4763, speeds to 19.2 kbps, distance to 50 feet without modem, requires I/O slot, max. 4 adapters, 3Q87)	425
1357 a	Four-Port RS-422A Adapter (16-byte buffer, replaces FC 4764, speeds to 19.2 kbps, distance to 4000 feet without modem, requires I/O slot, max. 4 adapters, 3Q87)	500
3797 a	Token-Ring Network Adapter for RT-PC (requires customer-written drivers)	1095
3390 a	Token-Ring Attachment Cable for RT-PC	35
6810 a	IBM RT-PC Baseband Adapter for use with Ethernet	850
4762 a	RT-PC Multi-Protocol Communications Adapter (Asc, BSC, SDLC to 64kbps, 2 concurrent ports)	850
4812 a	RS-232C Modem Cable for Multi-Protocol Communications Adapter, 3m	96
4814 a	Autocall Unit Cable, 3m	84
4816 a	X.21 Modem Cable for Multi-Protocol Communications Adapter, 3m	89
4756 a	PC/AT Coprocessor Card (req. I/O slot, FC 0203 memory recommended for performance, also supports FC 0211 (80287 chip))	995
7893 a	System/370 Host Interface Adapter (Attachment via 5080 Graphics Channel Controller at 2MB/sec)	1795
7561 a	5080 Peripheral Adapter (Not required if RT-PC is attached to 5080, requires I/O slot, contains 3 ports)	425
4710 a	Lighted Program Function Keyboard (32-button, req. FC 7564, 7561)	550
8710 a	Dials Unit (8 dials, req. FC 7564, 7561)	950
7860 a	5080 Attachment Adapter (Model 020-025 only, standard in A25, req. an I/O slot)	1795
6153-001 b	Advanced Monochrome Graphics Display (12in Diagonal) (2 color, variable character cell, 720H x 512V resolution, .37 Megapel)	610
4765 a	Advanced Monochrome Graphics Display Adapter (1024 x 512 bit map, displays 720 x 512 on 6153, req. an I/O slot)	775
6155-001 b	Extended Monochrome Graphics Display, RT-PC (15in Diagonal) (2 color, variable character cell, 1024H x 768V resolution, .79 Megapel)	975
4768 a	Extended Monochrome Graphics Display Adapter (1024 x 1024 bit map, displays 1024 x 768 on 6155, req. an I/O slot)	1450

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6154-001 b	Advanced Color Graphics Display (14in Diagonal) (64 color, variable character cell, 720H x 512V resolution, .37 Megapel)	1550
4766 a	Advanced Color Graphics Display Adapter (1024 x 512 x 4 bit map, palette of 16 colors from 64, displays 720 x 512 on 6154, req. an I/O slot)	1350
7658 a	Megapel Display Adapter (1024 x 1024 x 8 bit map, palette of 256 colors from 4096, supports 5081 and 5082, req. 2 I/O slots, req. FC2001 on 5081) inc. parallel printer adapter (5/87)	4500
7564 a	5080 Peripheral Cable Kit (1.2 meter)	53
7586 a	5083 Tablet Cable Kit (1.4 meter)	49
8245 a	ASCII Terminal Cable - RS-232C (9-pin, 3 meter)	55
8186 a	ASCII Terminal Cable - RS-232C (10-pin, 3 meter)	103
3913 a	ASCII Terminal Cable - RS-232C (10/25-pin, 3 meter) for attaching 316X terminals	70
7641 a	ASCII Terminal Cable - RS422A (6-pin, 3 meter)	42
4802 a	ASCII Terminal Cable - RS422A (6-pin, 20 meter)	78
8993 a	Serial Printer Cable (9-pin, 3 meter)	59
4803 a	Serial Printer Cable (10-pin, 3 meter)	64
4704 a	Modem Cable, RS-232C (10-pin, 3 meter)	64
8541 a	Fixed-Disk Attach Cable (attaches third Fixed Disk to second adapter)	52

RT-PC SUPPORT PUBLICATIONS

Each RT-PC System will be shipped with the
following four manuals (choosing the appropriate
maintenance manual)

SV21-8020	IBM RT-PC User Setup Guide	27.75
SV21-8021	Guide to Operations - RT-PC	20.25
SV21-8022	Problem Determination Guide - RT-PC	65
SV21-8026	Hardware Maintenance and Service Manual - RT-PC 6151	107
SV21-8025	Hardware Maintenance and Service Manual - RT-PC 6150	108
GA23-1058	IBM RT-PC Site Planning and Preparation	N/C
GC23-0784	IBM RT-PC Concepts	N/C
SV21-8024	IBM RT-PC Hardware Technical Reference	150

MODEL/FC VPA	DESCRIPTION	PRICE
IBM RT-PC ADVANCED INTERACTIVE EXECUTIVE		

For associated hardware, see "Processors - RT-PC System" on page 171.

These programs are discounted under the separate RT-PC Discount Agreement. The VPA Categories listed below are for that agreement only.

For a special promotional offering on the following item, see "RT PC AIX Operating System Promotional Offering" on page 1.

5669-061 A	IBM RT-PC Advanced Interactive Executive V.1.1 (FC's 9001, 5034, 4532), Warranted, Central Service 6 mo. notice or to 2/1/89	2295
5601-061 A	IBM RT-PC Advanced Interactive Executive V.2.1 (FC 9001, 5007) Warranted, Central Service to 2/1/89, Incl. function of VRM V.2.1	2295
4512	Upgrade RT-PC AIX V.1.1 to V.2.1 (FC 9001, 5008)	395
5669-060 A	IBM RT-PC Virtual Resource Manager V.1.1 (FC's 9001, 5033, 4531) Warranted, Central Service 6 mo. notice or to 2/1/89	895
5601-062 A	IBM RT-PC Virtual Resource Manager V.2.1 (FC4513) function incl. in AIX 2.1, Warranted, Central Service to 2/1/89	895
4514	Upgrade RT-PC VRM V.1.1 to V.2.1	100
5669-057 B	RT-PC PC/AT Coprocessor Services V.1.1 (supports AT processor card in RT-PC, FC's 9001, 5030, 4528) Warranted, Central Service 6 mo. notice or to 2/1/88	550
5601-077 B	RT-PC X-Windows (windowing system) (FC4524, 9/25/87) Warranted, Central Service 6 mo. notice or to 1/1/89	650
5669-056 B	RT-PC BASIC Interpreter (FC's 9001, 5029, 4527) Warranted, Central Service 6 mo. notice or to 2/1/88	1000
	RT-PC Advanced C Compiler Support Offering (education, C Compiler Information PRPQ, hotline access) (5/15/87)	1995
5776-EBY B	RM/COBOL Compiler and Runtime System for the RT-PC (FC's 9001, 4005, 5001)	1950
5776-EBX B	RM/COBOL Runtime System for the RT-PC (FC's 9001, 4004, 5000)	400
5669-054 B	RT-PC Fortran 77 V.1.1 (FC's 9001, 5027, 4525) Warranted, Central Service 6 mo. notice or to 2/1/88	650

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5601-037 B	RT-PC VS Fortran V.1 (FC 4500) High compatibility with Host VS Fortran 2.1, Fortran 77, and VAX Fortran V.3, Warranted, Central Service 6 mo. notice or to 2/1/89 (5/15/87)	995
5601-037	Upgrade RT-PC Fortran 77 to RT-PC VS Fortran (FC4510)	395
5669-242 B	Common Lisp Application Environment for the RT-PC by Lucid, Inc. (FC's 9001, 4664, 5141) Compiler and Interpreter	900
5669-243 B	Common Lisp Development Environment for the RT-PC by Lucid, Inc. (FC's 9001, 4665, 5142) Compiler and Interpreter	4000
5669-055 B	RT-PC Pascal V.1.1 (FC's 9001, 5028, 4526) High compatibility with Pascal on PC, Warranted, Central Service 6 mo. notice or to 2/1/88	1000
5601-038 B	RT-PC VS Pascal V.1 (FC4501) High compatibility with Pascal/VS on S/370, Warranted, Central Service to 2/1/89	1000
5601-071 B	RT-PC Distributed Services (Ethernet or SDLC transparent access to remote files, applications) (FC4520, 6/87) Warranted, Central Service 6 mo. notice or to 2/1/89	850
5669-053 B	RT-PC INmail/INnet/File Transfer Program V.1.1 (FC9001, 5025, 4523) Warranted, Central Service 6 mo. notice or to 2/1/88	625
5601-039 B	RT-PC Workstation Host Interface Program (3270 Emulation, File Xfer, API, req. RT Host Interface Adapter) (FC4502) Warranted, Central Service to 2/1/89	995
5669-052 B	RT-PC 3278/79 Emulation V.1.1.1 (FC's 9001, 5025, 4523) Warranted, Central Service 6 mo. notice or to 2/1/88	500
5601-044 B	Network 3270-Plus (SNA) for RT-PC (FC4505) Coax or SDLC 3278, 3287, multiple sessions, file transfer	995
5601-045 B	Network 3270-Plus (BSC) for RT-PC (FC4506) Coax or BSC 3278, 3287, multiple sessions, file transfer	1195
5601-043 B	Network RJE-Plus (SNA) for RT-PC (FC4504) 2780, 3780, 3770 emulation	995
5601-042 B	Network RJE-Plus (BSC) for RT-PC (FC4503) 2780, 3780, 3770 emulation	1195
5669-058 B	RT-PC Structured Query Language/RT Data Base V.1.1(FC's 9001, 5031, 4529) Warranted, Central Service 6 mo. notice or to 2/1/88	1000
5601-064 B	RT-PC Structured Query Language/RT Data Base V.2.1 (FC4517) Warranted, Central Service to 2/1/88	1000
4518	Upgrade RT-PC SQL V.1.1 to V.2.1	200
5669-059 B	RT-PC Data Management Services V.1.1 (FC's 9001, 5032, 4530) (V.1.1.1 available 6/87) Warranted, Central Service 6 mo. notice or to 2/1/88	500
5669-100 B	RT-PC Applix IA (word processing, graphics, mail, calendar) (FC's 9001, 5052, 4550)	1995

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
5669-187 B	RT-PC RS/1 by Bolt, Beranek and Newman (FC's 9001, 5133, 4610) Warranted, Central Service 6 mo. notice or to 4/17/89	5500
5669-107 B	RT-PC IMSL Library * (FC's 9001, 5059, 4557)	3500
5669-106 B	RT-PC IMSL SFUN Library (FC's 9001, 5058, 4556)	1495
5669-104 B	RT-PC IMSL MATH/PROTRAN (FC's 9001, 5056, 4554)	2100
5669-105 B	RT-PC IMSL STAT/PROTRAN (FC's 9001, 5057, 4555)	1495
5669-103 B	RT-PC IMSL LP/PROTRAN (FC's 9001, 5055, 4553)	2700
5669-050 B	RT-PC Graphics Development Toolkit (FC's 9001, 5023, 4521) Warranted, Central Service 6 mo. notice or to 2/1/88	700
5669-064 B	RT-PC Graphics Terminal Emulator (FC's 9001, 5037, 4535) Warranted, Central Service 6 mo. notice or to 2/1/88	600
5669-063 B	RT-PC Plotting System (FC's 9001, 5036, 4534) Warranted, Central Service 6 mo. notice or to 2/1/88	600
5669-062 B	RT-PC Graphical File System (FC's 9001, 5035, 4533) Warranted, Central Service 6 mo. notice or to 2/1/88	600
5669-108 B	UNIRAS-RASPAK * (FC's 9001, 5060, 4558)	3550
5669-101 B	UNIRAS-RASPAK Solids * (FC's 9001, 5053, 4551)	4995
5669-102 B	UNIRAS-UNIMAP * (FC's 9001, 5054, 4552)	7650

IBM 3812 PAGEPRINTER

The 3812 is available on the 4214/5200 VPA.

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
	The 3812 attaches to PC's via the Asynchronous interface. A 3812 may be shared via the Sharing Card (FC 3115), or the IBM LAN printer server functions.	
	In non-PC environments, a 3812 can also be driven by VM and S/3X hosts via Bisynchronous or Twinax attachment.	
	The customer is responsible for ordering and replacing the photoconductor, developer, and fuser units. One of each unit is shipped with each printer.	
3812-001	Pageprinter (maximum speed 12 pages/minute, 240x240 dpi resolution)	8235
3115	3812 Sharing Card (share 3812 among up to 8 PC's)	495
3050	3812 Printer Stand	325
3030	Cable, 3812-PC, 6 meter	79
3040	Cable, 3812-PC, 24 meter	119
3125	TEMPEST filter for 3812 (power line filter, instructions)	586
3135	TEMPEST Cable S-6 (6m long, RS-232C for PC attachment to 3812)	148
3140	TEMPEST Cable S-24 (24m long, RS-232C for PC attachment to 3812)	199
3130	TEMPEST Cable VM-6 (6m long, RS-232C for VM attachment to 3812)	148
	Note: when connecting FC 3030 or FC 3040 to an PC/AT-based PC or 3270-PC via the Serial/Parallel Adapter, FC 0217 or FC 0242 is required.	
9986	Power Cord (Chicago only)	14

PLOTTERS

XY/750	IBM Instruments Plotter B-size, 8-pen	4500
--------	---------------------------------------	------

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
6180-001 f	IBM Color Plotter, A-size, 8-pen, RS-232C Attach, pen speed 15.7in/sec (pen down), 20in/sec (pen up), resolution 0.001in, supplies kit	1285
6180-002 f	IBM Color Plotter, A-size, 8-pen, IEEE488 Attach, pen speed 15.7in/sec (pen down), 20in/sec (pen up), resolution 0.001in, supplies kit	1285
5010 f	Graphics Enhancement Cartridge, increases buffer from 60 to 1KB, char. sets from 5 to 19, 14 new commands, compatibility with HP 7475A	150
5050 f	RS-232C Cable between 6180 and PC	51
5060 f	6180 Programming Manual (=GA66-0501)	29
5070 f	Transparency Supplies Kit for 6180 (16 pens, 100 sheets film, available with original plotter order only)	130
5452382	Transparency Supplies Kit for 7371, 6180 (after initial order)	??
5457803	A-Size Quality Presentation Paper	??
6184-001	IBM Color Plotter, C/D-size, 8-pen, RS-232C Attach, pen speed 16.5in/sec (pen down), 19.7in/sec (pen up), resolution 0.001in, supplies kit	5400
5030	RS232C Cable between 6184 and PC (also req. FC0242 for PC/AT)	51
5050	GPIB (IEEE-488) Support Microcode Cartridge for 6184 (plant install only, req. FC5040)	295
5070	Programming Manual, 6184	22.25
6186-001	IBM Color Plotter, A-E size, 8-pen, cut sheet, RS-232C + RS-422A + IEEE-488 attach, pen speed 24in/sec, supports most HP 758xA drivers, resolution 0.00098in, supplies kit	9900
6186-002	IBM Color Plotter, A-E size, 8-pen, roll or cut sheet, RS-232C + RS-422A + IEEE-488 attach, pen speed 24in/sec, supports most HP 758xA drivers, resolution 0.00098in, supplies kit	11900
5030	RS232C Cable between 6186 and PC (also req. FC0242 for PC/AT)	51
5040	IEEE-488 Cable for 6186 (order on 6186 for 3270-PC/G/GX, additional, and for Infowindow)	102
5060	Drafting Plotter Supplies Kit, E Size, for 6186	392
5070	Programming Manual, 6186	35.75
7372-001 f	IBM Color Plotter, B-size, 6-pen, pen speed 15in/sec (pen down), 20in/sec (pen up), resolution 0.001in	1900
9910 f	RS-232-C Attachment Specify	N/C
9920 f	IEEE-488 Attachment Specify	N/C
7374-001	IBM Color Plotter, D-size, 8-pen, switch-selectable RS-232-C and IEEE-488 interface, pen speed 24in/sec, resolution 0.001in (W/D 6/3/87)	10000

As of April 6, 1987

MODEL/FC VPA	DESCRIPTION	PRICE
7375-001	IBM Color Plotter, E-size, 8-pen, sheet feed, switch-selectable RS-232-C and IEEE-488 interface, pen speed 24in/sec, resolution 0.001in (W/D 6/3/87)	13100
7375-002	IBM Color Plotter, E-size and 36in roll, 8-pen, switch-selectable RS-232-C and IEEE-488 interface, pen speed 24in/sec, resolution 0.001in (W/D 6/3/87)	17200
5030	RS232C Cable between 7371/2/4/5 and PC (W/D 6/3/87)	51
2720020	IEEE-488 Cable for 737X (order on 737X, for 3270-PC/G/GX, additional, W/D 6/3/87)	102
5796-BDZ	Industry Standard Plotting Commands interface for CADAM, CATIA, CAEDS, CBDS, and GDQF for 7371/2/4/5 on host-attached PCs, Central service to 12/85	395
5668-860	IBM Color Plotter Support for the GDDM Graphics Data File for 7371/2/4/5 on host-attached PCs, Warranted, Central service 6 mo. notice	1100

DIRECT-ACCESS STORAGE DEVICES, EXTERNAL

4869-001 b	External Diskette Drive, 5.25in for Personal System/2 (360KB) Req. FC 8750 for attachment to 8530, FC 8760 for other models (5/87)	335

IBM CABLING SYSTEM

The following is a summary of the major cabling types of the IBM Cabling System. Drive distances and lobe distances are with respect to the IBM Token-Ring Local Area Network.

- Type 1: Two shielded twisted pair for data, balanced (maximum recommended lobe 100m, up to 260 attaching devices; 750m maximum drive distance from 8218 repeater)
- Type 2: Two shielded pair as in Type 1, plus four unshielded twisted pair for voice
- Type 3: Media specification for telephone twisted pair, two unshielded twisted pair for data (maximum recommended lobe 45m, up to 72 attaching devices)
- Type 5: Optical fiber, for use between 8228's only (2km maximum drive distance from 8219 repeater)
- Type 6: Data patch cable, drive distance approximately 3/4 of Type 1 (i.e., count as 4/3x actual length); available from IBM in pre-assembled lengths of 2.4m, 9.1m, 22.9m, 45.7m
- Type 8: Undercarpet cable, drive distance approximately 1/2 of Type 1 (i.e., count as 2x actual length)
- Type 9: Media specification for plenum data cable, drive distance approximately 3/4 of Type 1 (i.e., count as 4/3x actual length)

Type	Description	Size	Part Number
1	Data Cable	22 AWG	4716748
	Plenum Data Cable	22 AWG	4716749
	Outdoor Data Cable	22 AWG	4716734
2	Data & Telephone	22 AWG	4716739
	Data & Telephone Plenum	22 AWG	4716738
3	Telephone Twisted Pair	22/24 AWG	---
5	Optical Fiber	100/140 micron	4716744
6	Patch Cable	26 AWG	4716743
8	Undercarpet	26 AWG	---
9	Plenum Data Cable	26 AWG	6339583

As of April 6, 1987

TECHNICAL COORDINATOR PROGRAM

(Executive Brochure, G520-4226)

Customers who have a Volume Purchase Agreement or other volume-based contract in place select one or more Personal Computer Technical Coordinators. These individuals, who are customer employees, are nominated by the customer and registered by the IBM Branch Marketing Office at IBM's discretion. A Technical Coordinator is responsible for end-user support in the areas of program usage and education, as opposed to defect-related service, which is handled by a Service Coordinator (see below). A given individual may be registered as both a Technical Coordinator and a Service Coordinator.

Note that a customer is qualified to nominate Technical Coordinators by virtue of having a volume-based contract currently in effect. A valid volume contract number must be entered by the Branch Office during the registration procedure.

The number of Technical Coordinators is generally based on the size of the volume-based contract. Note that under the Customer Fulfillment Option, purchases of IBM PC system units from authorized dealers count toward attainment of the volume-based contract, and toward eligibility for an increased number of Technical Coordinators.

System Units	Technical Coordinators
20- 49	1
50-149	2
150-249	3
250-499	5
500-999	7
1000 and up	By Request

Figure 72. Technical Coordinator Levels

The Technical Coordinator is supported by IBM's North-Central Marketing Division (NCMD) and South-West Marketing Division (SWMD) through the Personal Computer Assistance Center (PCAC) and local NCMD/SWMD branch activities. During the contract period of the Volume Purchase Agreement, the PCAC:

- Administers an education program for the Coordinator; and
- Provides assistance as required for all supported PC-related products marketed by NCMD and SWMD. This support includes:
 - ASKINFO electronic question-answering facility and data base; and
 - "800" telephone support.

ASKINFO features:

- A data base of questions submitted by customer Technical Coordinators and

As of April 6, 1987

IBM Systems Engineers since the introduction of the IBM Personal Computer, together with answers provided by personnel at the PCAC and other support centers.

- A search facility which allows Technical Coordinators to retrieve data base items by keyword.
- An electronic mail facility to help Technical Coordinators author new questions and route them to the appropriate support center for answering. IBM's target is to answer questions within 24 hours.

ASKINFO support is available for the 12-month duration of a volume-based contract. There is no charge for use and telephone access is toll-free.

Supported communications speeds are 1200bps and 2400bps. Existing ASKINFO users who elect to change to 2400bps support from 1200bps must request a new ASKINFO program diskette.

In addition, through the Major Function Support offering, ASKINFO support is available for a 3-month period, at IBM's discretion, following the first installation of certain products at a customer's establishment. The current registration period extends through December 31, 1987. The PC-related products supported are:

- Personal Services/PC
- DisplayWrite 4
- Series/1-PC Connect
- IBM PC Local Area Network Program
- IBM PC 3270 Emulation Program, V.3
- IBM 3270-PC High Level Language Application Programming Interface (HLLAPI)
- 3270-PC Upgrade: Expanded Memory Adapter (XMA)
- IBM Token-Ring Network PC Adapter

"800" telephone support is a second level of support available to Technical Coordinators. Technical Coordinators call the 800 number, leave an abstract of their question, and receive a callback within 24 hours from an IBM product expert for a discussion of the question.

"800" telephone support is available for the first six months of a 12-month volume-based contract.

NCMD/SWMD branch offices support their customers through a number of activities, including Technical Coordinator Seminars, communications system design reviews, application design reviews, etc.

See your IBM marketing representative for more details.

TECHNICAL COORDINATOR EDUCATION

TECHNICAL COORDINATOR TRAINING COURSE

The IBM Personal Computer Technical Coordinator Training Course modules (Course number G4002) presents the hardware, architecture, and Disk Operating System for

As of April 6, 1987

the IBM Personal Computer in two videos and fourteen computer-based instruction modules. Each module is independent, and students may skip subjects already mastered.

Students may enroll in this 2-1/2 to 3-day course by calling their local IBM Guided Learning Center. The tuition for this course is \$60 per half day, however, newly registered Technical Coordinators will be eligible to take this course on a nonbillable basis.

Subjects covered include:

- Using the ASKINFO data base
- Hardware overview, setup, and diagnostics
- System architecture, interrupts, and BIOS
- DOS fundamentals and advanced topics
- Debug workshop

See your IBM representative for more information.

SELF-SERVICER MAINTENANCE CLASS

This fee class, held in Atlanta, Georgia, is designed for a company or organization that wishes to perform its own Personal Computer maintenance. Typical accounts might have a minimum of 400 IBM Personal Computers presently installed and off warranty.

This 2-1/2 day class teaches:

- Hardware function and operation
- Problem determination procedures
- Servicer diagnostics and service procedures
- Service parts ordering terms and conditions.

To obtain enrollment packets and current prices, call your local National Service Division branch office. For more information, call IBM NSD Service Education, (404) 847-6543.

OTHER

IBM provides a number of classes of interest to the Technical Coordinator. In this Reference, see

- "Support Publications - Policy" on page 131,
- "Support Publications - Managing End User Computing" on page 131,
- "IBM Information Systems Management Institute" on page 163,
- "Technical Seminars" on page 166,
- "Science Research Associates - Leased Courses" on page 164.

As of April 6, 1987

PC UNIVERSITY

The PC University is a marketing program of non-fee seminars, 4 days in duration, held in Boca Raton, Florida. The seminars will be held approximately monthly.

WHO IS THE AUDIENCE? The intended audience includes key customer decision-makers who require detailed technical information on IBM workstation products to assist them in making decisions on workstation directions within their companies. The attendee will be a high-level technical executive charged with making or advising upon PC installation decisions.

WHO MAY ATTEND? This program is a major marketing support offering of the South West and North Central Marketing Divisions only. It is available to SWMD and NCMD customer accounts who have a Volume Purchase Agreement or Special Bid in place.

WHAT IS THE CONTENT OF THE SEMINARS? The intent of the PC University is to give the attendee an opportunity to have hands-on experience with IBM workstation products that are announced, but not yet available. Each seminar will include access to the product development managers for information on product direction and positioning. Product developers will be available to help answer questions of a more technical nature.

The agenda is not intended to be fixed. As new products are announced, PC University modules covering older product offerings will be replaced by the newly announced products. An early seminar will have very different modules from one held six months later.

The PC University offers technical information at an intermediate level, with more technical content than an overview. Product internals will not generally be covered.

WHAT DOES IT COST? There is no charge for attending PC University. The customer will pay for his own travel and lodging expenses.

HOW DO I ENROLL? The hands-on environment of PC University requires limited seating. Attendance is by invitation only, via a nomination process through the local IBM Area office. See your IBM Marketing Representative for details.

SOFTWARE DEFECT SUPPORT

Personal Computer software is generally sold "as is."

Software indicated by the phrase "Central Service" above is supported by IBM for defect correction. Customers may mail-in or call-in defect documentation for resolution by IBM or the developing organization, depending on the product.

This support is typically for a limited period, as described in the program announcement.

- "Central service to..." indicates that service will be provided up to a cer-

As of April 6, 1987

tain date.

- "Central service for..." indicates that service will be provided for a certain duration after delivery to the customer.
- "Central service ... notice" indicates that IBM will not withdraw service until having given a certain period of notice.

Products have varying registration requirements for obtaining central service. Some require that a Quantity Discount Agreement be in effect, others require mailing a registration card. See the announcement material for each product for details.

Certain products have extended support, as described below.

SOFTWARE EXTENDED SUPPORT

TERMS AND CONDITIONS

(Executive Brochure, GH30-9017)

Licensed users of selected IBM Personal Computer program products may subscribe to the IBM Extended Support Option via a 12-month subscription. One subscription provides defect and non-defect support for multiple IBM licensed programs within a program series.

To subscribe to any of these services, call the IBM Extended Support Center in Atlanta at 1-800-IBM-2266.

Defect support is included in the base annual subscription charge. Under this support, the subscriber may mail in requests for correction of defects in supported programs during the subscription period. Purchase of this subscription extends the support of this type normally available for 90 days after purchase of a supported product.

For certain programs, IBM may include any of the following services in the base subscription, as noted in the tables below. If not included, a service may be available for a separate fee. Not all services will be available for all products.

- Support Journal: for certain products, these journals provide operational tips, coding tips, techniques, answers to common questions, and announce availability of updates and new products. Additional Support Journals may be ordered for an annual or per-copy fee.
- Telephone Assistance: for specific product questions, related to either defect or non-defect support. the customer has toll-free access to the Extended Support Telephone Center Telephone assistance, where available, may be available on a "single incident," "multiple incident," or annual fee (where an incident may involve more than one call concerning a particular problem).
- Program updates: the customer may request shipment of program updates for supported programs as available. Updates may be available via either an annual or per-update fee.

As of April 6, 1987

- Application Services Subscription: the customer will receive updated non-program data files (e.g., payroll tax tables), together with any available Program Updates.

This support is available to licensed users of the supported programs who desire program-related service or in-depth technical support beyond what is provided with the program. This support is intended to complement existing customer assistance furnished by IBM representatives. Program updates may also be available to non-subscribers for a separate fee.

As of April 6, 1987

CENTRAL SERVICE - IBM SUPPORT CENTER

IBM supports certain IBM Licensed Programs for defect correction through the National Service Division, IBM Support Center and Information Systems Group, Service Staff Central Service. Correction for programming defects in these products is provided to the customer's Service Coordinators.

These individuals, who are customer employees, are nominated by the customer and registered by the IBM Branch Marketing Office. A Service Coordinator is responsible for end-user support in the areas of program defect resolution and service distribution, as opposed to usage-related assistance, which is handled by a Technical Coordinator (see above). A given individual may be registered as both a Technical Coordinator and a Service Coordinator.

Note that a customer is qualified to nominate Service Coordinators by virtue of having purchased a supported IBM product; a volume-related purchase contract does not generally have to be in effect. If no volume-based contract is in effect, a Service Coordinator may be registered by the IBM Branch Marketing Office for "FE Entitlement Only" using the standard contract number, 37661.

Customers who were designated as Technical Coordinators and registered (as of December 17, 1985) for defect support will now be supported as Service Coordinators registered for defect support. Support will continue as defined under the terms and conditions of the designated IBM licensed programs.

TERMS AND CONDITIONS

The following is a paraphrase of the terms of support typical for these products. See the announcement material for each product for specific terms and conditions.

Central service, including the IBM Support Center of the National Service Division will be available until the termination date.

The IBM Support Center will provide the customer-designated registered Service Coordinator with telephone assistance in problem diagnosis and resolution. The customer-designated registered Service Coordinator may call the IBM Support Center at any time, and will receive a return call within one business day.

Certain programs require that a Quantity Discount Agreement (QDA) be signed in order for the customer to receive service. In such cases, support will be provided only to QDA-contracted customers via designated customer Service Coordinators. For customers ordering less than 20 licenses and desiring central service support, a QDA must be signed.

The customer Service Coordinator will act as the interface between the customer and the IBM Support Center.

Preventive service is provided on a cumulative basis through refreshes; no

As of April 6, 1987

source code is provided. One copy of each refresh and its supporting documentation will be provided to the customer's Service Coordinator. The customer's Service Coordinator is responsible for making and distributing copies to workstations that have the program installed. One copy is allowed per licensed program. There may be a distribution charge for refreshes.

Additional copies of the refreshes and supporting documentation may be ordered by the Service Coordinator.

Corrective service will be provided only to customer Service Coordinators through program patches; these are applicable only to current refresh levels.

IBM Service/Exchange Communication Center (800) 428-2569

MAINTENANCE OPTION DESCRIPTIONS

Machine maintenance charges include coverage for all components of the standard configuration for the model. Expansion unit charges include one 10MB fixed disk drive. Prices below are for 12-month term. Some geographic restrictions apply.

IBM service personnel may remove and reinstall non-IBM option cards in IBM PCs being serviced by IBM when the IBM service representative determines that the removal or reinstallation will facilitate IBM problem isolation or maintenance of the IBM portion of the PC. If it is determined that a non-IBM option card is the cause of the reported failure, IBM's normal billing guidelines will be followed.

If the customer wishes IBM to remove a failing non-IBM machine or feature and install a similar non-IBM, customer-supplied, replacement item, this service is available for an annual charge per system unit. This service is available only on IBM PC system units for which IBM On-Site Repair Type of Service is selected under an IBM maintenance agreement or provided under an IBM warranty. It is not available for non-IBM items for which IBM offers maintenance agreement service.

Under IBM's Expanded Support offering for non-IBM products, (a service available at extra cost) IBM will at the customer's direction purchase commercially available non-IBM products at the time of failure, for replacement of an identical or similar failing non-IBM machine or feature. This offering does not apply to warranty service for the non-IBM device, but is available for devices attached to any IBM PC system unit with an On-Site Repair maintenance agreement or On-Site Repair warranty-type.

For machines not covered by warranty or maintenance options, the customer may elect to have service done on a time-and-materials basis.

HOURLY MAINTENANCE

Carry-In Service options are:

- Customer Carry-In Repair hourly service
- Customer Carry-In Exchange hourly service.

Charges for IBM hourly service provided at designated IBM Service / Exchange Centers are:

- The current standard rate for all Service / Exchange Center products is \$115

As of April 6, 1987

per hour.

- The current minimum is 7/10 of an hour and applies to each machine or machine element requiring either a repair or a repair estimate.
- Actual time in excess of the 7/10 of an hour minimum will be charged in tenths of an hour, rounded to the nearest tenth of an hour.
- There are additional charges, as applicable, for replacement parts, shipping and other applicable expenses.

IBM On-Site Service options are:

- IBM On-Site Repair hourly service
- IBM On-Site Exchange hourly service.

Charges for IBM hourly service provided at customer sites are:

- The current minimum is one hour for repair or one hour for exchange, plus travel expense.
- There are additional charges, as applicable, for replacement parts, shipping and other applicable expenses.

Machines and machine elements that have been exchanged by IBM, and replacement parts that are installed in an IBM hourly service incident, are warranted for three months.

MAINTENANCE PLANS

IBM ON-SITE REPAIR

IBM will repair and test the failing machine at the customer's site.

IBM ON-SITE EXCHANGE

IBM will deliver to the customer's site a functionally equivalent machine in good working order and replace the failing machine with this exchange machine. IBM will set up and test the exchange machine and remove the failing machine from the customer's premises.

CUSTOMER ON-SITE EXCHANGE

IBM will have a functionally equivalent machine in good working order delivered to the customer's site. The customer will disconnect the failing machine and return the failing machine to IBM, in accordance with IBM's instructions. IBM is responsible for both outbound and inbound shipping charges.

As of April 6, 1987

CUSTOMER CARRY-IN EXCHANGE

The customer will deliver the failing machine to any of more than 100 IBM Service/Exchange Centers or other IBM designated locations. IBM will exchange a functionally equivalent machine in good working order for the failing machine. The customer, in lieu of such delivery, may ship the failing machine prepaid only to one of the IBM Service/Exchange Centers designated to receive such shipments. IBM will ship the exchange machine prepaid to the customer's location in the United States or Puerto Rico.

CUSTOMER CARRY-IN REPAIR

The customer will deliver the failing machine to any of more than 100 IBM Service/Exchange Centers or other IBM designated locations. IBM will repair the machine and notify the customer as soon as it is ready for pick up. The customer, in lieu of such delivery, may ship the failing machine prepaid only to one of the IBM Service/Exchange Centers designated to receive such shipments. Following any necessary repairs, IBM will ship it prepaid to the customer's location in the United States or Puerto Rico.

Warranty Period (Months)	Warranty Service Type
--------------------------------	-----------------------------

WARRANTY PERIOD AND TYPE - FEATURES

The warranty period for certain optional features will be extended when these features are installed in a 5155 or 5170-based system (e.g., 5373), which is still under warranty. The warranty period for these features would normally be three months. However, the warranty period will be extended to coincide with the system unit warranty period. Optional features installed after the system unit is installed, with their normal warranty extending beyond that of the system unit, will receive their normal warranty. See the announcements of the 5155 and 5170 for details.

STATEMENTS OF DIRECTION

Announcement and availability of these products will be based on IBM's technical and business judgement.

IBM PERSONAL SYSTEM/2 ADVANCED INTERACTIVE EXECUTIVE (AIX)

Letter 287-122; April 2, 1987

IBM will provide an IBM Personal System/2 Advanced Interactive Executive (AIX) Operating System and AIX languages VS Pascal, VS FORTRAN, and C for the IBM Personal System/2 Model 80. The IBM Personal System/2 AIX Operating System will be a subset of the multiuser, multitasking, virtual memory AIX operating system currently available on the IBM RT PC. PC DOS 3.3 will be supported as a task under the IBM Personal System/2 AIX Operating System. The IBM Personal System/2 AIX languages will be source code compatible with RT PC VS Pascal, RT PC VS FORTRAN, and C languages. This offering complements the current AIX offering on the RT PC by extending the AIX family.

Information regarding the price, scheduled availability, and applicable terms and conditions will be provided fourth quarter 1987.

4680 ENHANCEMENT

Letter 187-096; April 2, 1987

IBM intends to utilize the architecture and technology of the new IBM Personal Computers, being announced today (i.e. 8530, 8550, 8560, 8580), in future 4860 Store System Controllers.

SRPI OVER LOGICAL UNIT 6.2

Letter 186-125; June 16, 1986

It is IBM's intent to provide to those programs using the SRPI (Server Requester Program Interface) the capability of also communicating over logical unit 6.2 in selected environments.

The communications capability offered through the SRPI provides a subset of IBM's advanced program-to-program communications (APPC) architecture. Those customers who require communications capabilities beyond those provided by the SRPI should consider the advanced functions of APPC in IBM licensed programs.

As of April 6, 1987

SERIES/1 PC CONNECT UNDER EDX

Letter 185-024; March 6, 1985

(Fulfilled in Letter 285-364; October 1, 1985)

IBM is providing support for the Series/1 PC Connect under Realtime Programming System Version 7.1. IBM intends to provide the function announced today under Event Driven Executive using the Communication Facility, in a future enhancement.

OFFICE SYSTEMS CONNECTIVITY

Letter 284-402; October 25, 1984

IBM intends to extend Personal Services/PC DIA support to provide Personal Computer users with access to:

- DISOSS/370 library services (Fulfilled in Letter 286-166; April 16, 1986)
- DISOSS/370 library and distribution services when attached to the IBM PC Network and other IBM networks supporting the NETBIOS interface (Fulfilled in Letter 286-132; April 2, 1986)
- Library and distribution services on the System/36 and System/38.

DFT SUPPORT FOR 4361

Letter 184-103; September 10, 1984

(Fulfilled in Letter 185-058; June 18, 1985)

IBM intends to provide DFT (Distributed Function Terminal) mode capability for the WSA (Workstation Adapter) on the IBM 4361 Processor Model Groups 3, 4, and 5.

The DFT mode enhances the capability of the WSA as follows:

- up to four concurrent host sessions, eight colors, extended highlighting and programmed symbols on the IBM 3270 Personal Computer (PC),
- attachment of the 3270 Personal Computer/Graphics (PC/G) and 3270 Personal Computer/Extended Graphics (PC/GX) with their full set of graphics functions.

TOPVIEW FOR PC NETWORK

Letter 284-282; August 14, 1984

As of April 6, 1987

(Fulfilled in Letter 286-137; April 2, 1986)

It is IBM's intention to have TopView capabilities available for the IBM PC Network in the future.

PC NETWORK FUNCTIONS FOR 3270-PC

Letter 284-285; August 14, 1984

(Fulfilled in Letter 186-173; September 18, 1986)

IBM intends to provide the IBM PC Network program server functions for IBM 3270 Personal Computers which are attached to selected models of the same IBM 3270 display controller. The IBM Cabling System can be used to connect the IBM 3270 Personal Computers to the display controller in these environments. The IBM 3270 Personal Computers also continue to have access to System/370 based applications via existing interfaces as they do today.

NETBIOS SUPPORT FOR OTHER NETWORKS

Letter 284-293 and 284-292; August 14, 1984

IBM intends to provide support of the IBM PC Network Program and the network basic input/output system (NETBIOS) interface for IBM Personal Computers in the following environments:

- IBM Cabling System using the token-ring protocol (Fulfilled in Letters 185-123 and 285-398; October 15, 1985).
- IBM 3270 Personal Computers attached to selected models of the same IBM 3270 Display Controller

(Fulfilled in Letter 186-173; September 18, 1986).

- IBM Industrial local-area network using the token-bus protocol.

3270 DATA STREAM SUPPORT FOR TOKEN-RING NETWORK

Letter 284-294 and 284-292; August 14, 1984

(Fulfilled in Letter 185-123; October 15, 1985).

IBM intends to provide IBM 3270 interactive data stream compatibility for access to System/370-based applications for IBM Personal Computers, using the token-ring protocol on the IBM Cabling System.

As of April 6, 1987

INTERCONNECTION OF TOKEN, PC, AND INDUSTRIAL NETWORKS

Letter 284-292; August 14, 1984

IBM intends to provide interconnection between a Token-Ring local area network using the IBM Cabling System and the IBM PC Network, (Fulfilled in Letters 185-123 and 285-400; October 15, 1985), as well as between a token-ring local area network using the IBM Cabling System and an IBM Industrial local area network.

GRAPHICAL KERNEL SYSTEM SUPPORT

Letter 284-245; June 25, 1984

(Fulfilled for the PC in Letter 284-346; October 9, 1984)

Graphical Kernel System (GKS), a Draft International Standard (ISO/DIS 7942) of the International Organization for Standardization (ISO), is a basic graphics system supporting the definition and representation of two-dimensional pictures on a wide variety of graphics devices. IBM recognizes the importance of this Draft International Standard and intends to provide GKS capability in selected graphic software, including the IBM Graphical Data Display Manager (GDDM).

ALPHANUMERIC PROGRAMMING INTERFACE FOR 3270-PC/G AND GX

Letter 184-079; June 25, 1984

(Fulfilled in Letter 285-285; August 6, 1985)

As stated in the 3270-PC announcement of October 1983, it is IBM's intent to provide an alphanumeric programming interface on the 3270-PC. It is the intent to offer a similar interface on the 3270-PC/G and 3270-PC/GX.

INTELLIGENT WORKSTATION SUPPORT FOR APPLICATION SYSTEM

Letter 284-192; May 15, 1984

Application System (AS) is a decision support and departmental computing tool with comprehensive function to support the work of business professionals, managers, administrators, secretaries, and application programmers. Increasingly, the data these users need is relational in nature (for example, that provided by IBM SQL/DS and DB2), the workstations they may use have local intelligence (for example, the IBM 3270-Personal Computer, the IBM Personal Computer, and the IBM Personal Computer XT); and the host operating system they access (for example, Multiple Virtual Storage (MVS)) requires the support of such tools as AS. The direction of future development of the AS product line is to provide the user

As of April 6, 1987

with function, access to data, support for workstations, and the modes of delivery consistent with these needs.

Further information covering this direction statement will be made available fourth quarter 1984.

LOCAL AREA NETWORK ON CABLING SYSTEM

Letter 184-068; May 8, 1984

(Fulfilled in Letter 185-123; October 15, 1985)

IBM has announced the IBM Cabling System, a common cabling system that can be used as an alternative to coaxial, twinaxial, twisted pair, and other special purpose cabling.

IBM intends to implement a star-wired, token-ring local area network using the IBM Cabling System within the next two to three years.

This token-ring local area network is consistent with IBM's contributions to the local area network standards committees of the Institute of Electrical and Electronics Engineers (IEEE) and the European Computer Manufacturers Association (ECMA).

DISOSS SUPPORT FOR PC AND 3270-PC

Letter 284-138; April 3, 1984

(Fulfilled in Letter 284-419; October 25, 1984)

For planning purposes, IBM provides the following statements of direction regarding office systems.

In addition to the document content architecture (DCA) support announced today, it is IBM's intent to enhance these office functions on the IBM Personal Computer and the IBM 3270 Personal Computer by supporting, via document interchange architecture (DIA), connection to DISOSS/370.

3278 EMULATION SUPPORT FOR PC/XT/370

Letter 183-141 and 183-139; October 18, 1983

(Fulfilled in Letter 184-141; October 25, 1984)

IBM intends to make a Product Announcement to the IBM Personal Computer XT/370 to address the following: A card, similar to the PC/3277EM card, which will allow the IBM Personal Computer XT/370 to attach via coaxial cable to type A

As of April 6, 1987

adapters on an IBM 3274 Control Unit that support the IBM 3278/79 Display Stations.

ADDITIONAL FUNCTION FOR THE 3270-PC

Letter 183-129; October 18, 1983

(Graphics direction fulfilled in Letter 184-021; February 21, 1984)

(API direction fulfilled in Letter 284-286; August 14, 1984)

Statement of direction for the 3270-PC: IBM intends to provide additional capabilities for the 3270 Personal Computer in the areas of graphics and programmable interface. Announcement of these capabilities will be based on IBM's technical and business judgment. The following brief descriptions provide the IBM Statement of Direction for the 3270 Personal Computer.

- Graphics -- provide eight-color IBM Personal Computer CGA (color/graphics adapter), graphics, and host graphics.
- Programmable interface -- a programmable interface to the 3270-PC Control Program will be defined to allow program developers to create customized applications for the 3270-PC, including applications to interrelate host and IBM Personal Computer data and programs.
